Virus Spread Tutorial

Hey all. This is my new tutorial about some of ways to spread your virus and get more logs from stealer,Botnet(s),RAT connections and much more.

Tutorial is by me so if you post on some other websites,blogs,forums etc. please put credit on me, Om3n.

(1.) First of all the bust way what i suggest to others are warez sites.

Whats Warez-Website?

Warez is site where you can find free cracked expensive softwares like AVG Internet Security,Kaspersky Internet Security 2008,Keyscrambler but the best way to spread on that kind of websites is to post something what include a crack what need to be runed to crack software but ofc must works + crypted + binded Trojan. Also you can do that on some stupid people to pind some videos,pictures or something what is not .exe! Also the realy important thing is to post colored text,interesting images,virus scan (make sure its novirusthanks.org or some other what doesnt sent scan results to Antivirus companie) and find some people to post fake comments like i do. Also when you spread make sure you got few accounts not one, maybe 3-4.

(2.) Second and realy important thing is YouTube

Whats YouTube?

Uhh everyone know what is YouTube. Thats famous website where people share their videos,ideas and softwares ofc. There come our part ?. So what you gonna do is to make new account dont put any name what have text: "Hacker" or some other thing what make people not download your softwares. Make some stupid simple to people think you are kid, thats realy important thing. Also like i said before get fake comments thats realy important thing on YouTube spreading. Also like i said before too you will need few accounts. I suggest one for some fake programs (like some programs you make in C#,C++,VB.NET,VB6, for explanation: WoW Gold Hack, Runescape Hack etc.). A lot people wanna be hackers so they will sure download that kind of programs. I do that way i get around 20 victims per day per account (so thats around 40-50). Also use GAME CHEATS. People love cheating so they will sure download. I make videos for games like: CS 1.6,CS:S,COD4,WoW etc. Make sure they works and they are crypted what is realy important or you will lose your connections because when AV detect Trojan they automatic block it and make your virus unusable what you dont want to heppen ofc. Next way is like on Warez website is to use Cracks,good softwares,antiviruses etc.

(3.) Next important part of spreading your virus are Torrent websites.

Whats Torrent

On torrent site's you can find anything, movies,pictures,wallpapers,games,programs etc. So thats good for us. But i dont really use torrents for spreading viruses but they are great. I dont have time to upload big games,movies and things like that so i just use YouTube and Warez. I suggest not to use big torrent sites like pirate bay because they send every file on virus scan to antivirus companies which is really bad for you if you buy one FUD private crypter. You dont want that to happen so just use some small Torrent websites.

IMPORTANT: Never upload your crypted Trojans on #. The reason because sometimes if you dont have premium account it will limit downloads on 25 or maybe close your premium account (what happened to one guy i know) SO NO #.

P.S. I know this is short tutorial but i hope it helps.

sendnudge - September 28, 2009, 11:08 am
very helpfull,

-to short-

Illuminati - September 28, 2009, 12:05 pm
Skid tastic bullshit

nuff said

Nook1e - September 28, 2009, 12:33 pm
Very nice way to get more vic's. ;)

Fr0st_Byte - September 28, 2009, 12:38 pm
Nothing you said was wrong, but its all been said numerous times on the site.

Its a good post, but its overdone and all it really did was help your post count.

Om3n - September 28, 2009, 3:41 pm
Thanks, glad you like it.

?????q??l???? - September 28, 2009, 3:51 pm
Most of it should be general knowledge, but this will help newbies. Nice post nonetheless.

Xch4ng3 - September 28, 2009, 3:53 pm
Quote:Rep is always greatly appreciated, thanks!

Good tutorial and nicely laid out, but your not allowed to ask/indicate for +Rep. Might want to remove it before you get a warning.

xAsylum - September 28, 2009, 3:57 pm
i thought it was a good post. i mean, its pretty obvious to most about these things, but for the newcomers, its quite helpful :) good thread,

hazard74 - September 28, 2009, 6:22 pm
erk...
i want learn how to Spread a virus..

but i give me some use full information to
Spread a virus thx alot.
+Rep

Om3n - September 29, 2009, 8:35 am
Thnx

Btw im not "BEGGING" for rep just saying....

Aggression - April 4, 2010, 2:20 am
I already knew most of that stuff but a good tutorial none the less.

cplx - April 4, 2010, 6:03 am
nice tut

short short short

penetrator - April 4, 2010, 6:52 am
much Helpful.....

manndi - April 4, 2010, 7:07 am
nice tutorial,thak you

???? ???? - August 29, 2010, 12:43 am
BRAVO S.C your threads are amezing and you are the BEST my friend

Grudgeee - August 29, 2010, 12:49 am
Nice tutorial. There is so many ways to spread it now.

azeer - September 1, 2010, 10:34 am
thanks dude , but i think the tuto will be more Interesting if you add a second part for botnets

1it2 - September 1, 2010, 8:20 pm
me use SE . .the best spreading technique

!ron m@n - June 30, 2011, 7:33 am
Nixe tut man ! :) keep it up!

[KiLLeR]Hussen - July 1, 2011, 4:00 am
very nice tutorial u made , Thanks alot :) , got 4 victims from this tut xD and yea, torrents help alot :D
.

[KiLLeR]Hussen - July 1, 2011, 4:01 am
very nice tutorial u made , Thanks alot :) , got 4 victims from this tut xD and yea, torrents help alot :D
.

x-x - July 1, 2011, 4:11 am
:D will try making some virous bind with crack software

Ompan - July 17, 2011, 8:23 am
Thanks for the information very helpful! =)

raoulduke - July 1, 2013, 4:20 am

Nice thread! But it would be very helpful if you also showed a good way how to infect a specific person!

mcclouis - July 1, 2013, 4:29 am

I will have to try this out, cheers.

pimmelz0r - November 19, 2013, 1:10 am

Great, gave me some good advice how to handle spreading !

ibracadabra - November 19, 2013, 11:04 am

good tip #..i never uploaded there, but now i will never in future

thx

abdjoseph - November 19, 2013, 4:54 pm

Great tutorial.. Will definitely come handy.. thanks mate

Staufenberg - November 22, 2013, 4:54 am

Very nice tutorial big thanks. thanks for share =)

zukkfb - September 14, 2014, 4:59 am

Very nice man, good tutorial spread a virus, thanks!!!

weeman74 - December 6, 2014, 2:55 am

Thanks man ;) that pretty good !!!!!

mrdoit0 - December 6, 2014, 10:35 am

very helpfull, tks for sharing your knowledge

nondescriptoldie - December 7, 2014, 1:10 am

Good tutorial and very simply laid out. Although is a but short and needs to go in depth more on "how" it works and "how" to perform this. :P

swimmingplaces - March 17, 2015, 4:09 am

Very nice man, good tutorial spread a virus, thanks!!!

shakesb33r - March 20, 2015, 12:47 am

Who can spread my FUD keylogger on Forums ? I will pay ofc :) add me on skype: pc-freak92

krix - March 20, 2015, 10:54 pm

Thank you bro!!

which is very help full

nhnkl3 - March 21, 2015, 5:32 am

Very nice way to get more vic's. ;)

Dark n' Deep - March 21, 2015, 8:43 am

Extremely help fun, sir! ?

funm69 - September 16, 2018, 1:55 am

Thanks for this, got me startet with spreading!

mana776 - September 17, 2018, 8:46 pm

nice method dude trying it

ScrubMuffin - *September 19, 2018, 9:40 am*

thanks man means alot going to give this a try
