You realise that you are going to get arrested, considering you are a member at HF, and unless you used a proxy every time you opened HF, HF has your real ip -> all they need to do is ask Omni who will gladly give it to any legal authority.

TL;DR: You are screwed, no denying it.

supracontra - August 8, 2011, 2:42 am

Love how you use havij for everything, do you even know how to manually inject?

Black Beard - August 8, 2011, 3:29 am

I accidentally clicked the vuln link with my real ip, has anyone else done this? I just opened to see what it was and closed.
