Thread: [\[Tutorial\] Spreading \[Simple\]](#)

SIM-297877 - August 8, 2011, 4:53 pm

One of the most SIMPLE ways to spread

Ok this is a simple tutorial on how to spread your bot/rat/keylogger ect. using YouTube

What you need:A FUD Server, Bot or Keylogger

A Spare YouTube account

Downloader (You can make this or Download one)

Some type of video making software

Ok so lets say that you have your FUD server or whatever, Follow these steps...

Step 1:

Upload your FUD server to a free hosting site that supports direct links.

Step 2:

Now you can ether make a simple downloader in about ANY programming language or just find one here using the forums 'Search' button. Type the URL of where you uploaded the file and build the downloader.

Step 3:

Ok so now thats ready, Now you can search on google for 'New Free MMO games'

Tips:Look for Open Beta Games

Look for FPS or RPG games

Younger kids fall for these ALL the time

After you have found a good one, Wright the name down.

Step 4:

Use your Video software to make a simple video saying that this is a Gold/Money hack that was once sold for \${Input Random # here} and a Hacker named {input: Dumb name here} has cracked and made it for free.

Step 5:

Upload the downloader to a free file hosting website, and upload the video to YouTube. In the description of the video past the link to the downloader.

You are now done. Simple wait and in NO TIME you will have 11 year old's downloading your server/bot.

Example of complete: Spoiler ([Click to View](#))[Video:

Thanks for this, I will be sure to give it a try.

Eternity - August 8, 2011, 4:58 pm

Well, I'm pretty sure once they figure out it's not working they will tell all there little friends as well.
