If you send to many that happens. When you load emails make sure you load at least around 10 for over 100 sms messages. A email can only handle around 40 or 50 until it the email providers anti spammer kicks in.

Mogo - August 9, 2011, 11:49 am

Okay. How do I find my victim's carrier?

And is there anywhere I can find a list of emails to load?

I havnt found one yet that will work in the UK your best bet would be to find a free online sms website and send one at a time unless someone can somehow make one which sends more than 1 txt at a time then it would act like a sms bomber and work in the UK.
