Hey, well I myself do know how to code c++. Currently work at a MS Hacking site. Anyways, here are some old C++ Sources i've managed to get since either a long time ago, or new.

These are mainly learned how to make HACKS, or show components that people can use. Wether D3D Drawing, or simple functions.

?[I DO NOT TAKE CREDITS] ?

?<Most of these are leechd sources for learning purposes>?
