Thread: [\[Crypt my server\] Can someone please crypt my Cybergate server?](#)

**\_Baphomet\_** - August 10, 2011, 10:08 am

I got like 5 victims in like 4 hours, and 4 of them already disappeared due to mines not being fully FUD. I cannot pay as of now, but if there is anyone who can FUD a 1.0.75 server, please do and tell me what settings you need? And if you can do Darkcomet 3.3, much thanks as well! Either one is fine.

Read my signature, you might find it better if you buy a private crypter. I would recommend buying Sheikh Crypter, it's been FUD since release due to constant updates. You'll be able to recrypt the files as many times as you want.
