Hi, i want to know if anyone here tested out the site Quibids ? If yes it is legit ? It's a site where you buy bid coins and you bid on products and you can have a macbook for like 20\$

It is a LEGITIMATE site, they put ads on CNBC. But I wouldn't sign up for it if I were you. There are lots of "penny auction" sites online, google it. And it's really hard to win on those sites.

Just google it and read some reviews, you will end up losing more money than winning on average. But good luck!
