Thread: [\[PREVIEW\] sLogger - The ultimate remote steam logger](#)

SIM-121380 - August 10, 2011, 7:06 pm

Hey,
I just finished coding my tool to hack steam acc, I'm not gonna make a long thread to introduce it so I will only give features and why I am not selling it atm

Features :

- Delphi coded so no fucking .NET dependancies.
- 100% stability due to restricted features(only for steam hacks).
- Password recovery
- Steam logger
- Info's (Inform if steam is installed on comp, what the steam username and pc info's..)
- And some usefull features to get steam acc successfully

Screenshot :

[img]<http://img714.imageshack.us/img714/3617/sansremc.png>[/img]

I'm gonna sell it when my friend will finish his HWID system

Thanks for reading and sorry for bad english ! :D

Agent Shark - August 10, 2011, 7:08 pm

It does look quite interesting. Good luck on sales when it's released :D

Thanks, appreciated ! :D

(Aug 10, 2011 07:08 PM)Deceive Wrote: [\[CITE\]](#) sLogger... I see what you did there =D

Nice tool bro.Thanks ! :D

I thought sLogger good for my tool :p

vmartin - August 10, 2011, 7:32 pm

That's pretty legit... Good luck with the project.

Active - August 10, 2011, 7:34 pm

I really REALLY want to buy this pm me please .

SIM-121380 - August 10, 2011, 7:50 pm

begin sales soon ! Keep a look at marketplace ! :D

what else? - August 11, 2011, 4:53 am

Vouch for PornCore,

I was seeing him when he was coding this fucking tool :D

I've coded the nAuth Hwid System.

We will sell it at the begin of September.

I'm in holidays, there is several securities to be added.

and PornCore is going to be in holidays soon.

Project always up, going to totally recode the server part in pure winsock api, planned file size = less than 100ko

RainBowHat II - September 21, 2011, 12:45 pm

Looks like a good tool . I'll be looking forward to buy it. Any idea on what the price is going to be?

jgwentworth - September 21, 2011, 5:53 pm

Ok, so its a RAT that can only steal steams?

Wouldn't it be just as easy to use DarkComet on that case?

.Astro - September 21, 2011, 5:55 pm

If you need anyone to do designs for your product like banners, signatures, logos, thread designs, etc, PM me c:

Wouldn't it be just as easy to use DarkComet on that case?I see lot of advantage to my rat instead of darkcomet TO hack steam acc, why?

Reasons :

- It has been made to be the easiest as possible to hack steam acc (I mean there that, everything is automatic)

- It will be lot size smaller then dc (dc is 600ko and mine will be less then 100ko)

Zeon - September 22, 2011, 1:35 pm

Will this thing require port forwarding?

dylanups - September 22, 2011, 1:48 pm

Will it check for stem then run? So you can run it on bots and not worry about ones that dont have steam?

SIM-121380 - September 22, 2011, 3:23 pm

(Sep 22, 2011 01:35 PM)Zeon Wrote: [\[CITE\]](#) Will this thing require port forwarding?Yes it will require port forwarding

(Sep 22, 2011 01:48 PM)dylanups Wrote: [\[CITE\]](#) Will it check for stem then run? So you can run it on bots and not worry about ones that dont have steam?I don't really understand what you mean but yes it check if steam is installed and runned then you will be able to open and close it as you want :)

Zeon - September 22, 2011, 11:16 pm

Oh it it requires port forwarding then you're better off with a real RAT.

? Lollipop ? - September 23, 2011, 12:37 am

I don't really get the point of this when you could just use blackshades and steal steam accounts with that.

SIM-121380 - September 23, 2011, 2:04 am

It has been made to hack steam acc as easiest as possible, sure you could use bs but it is specialized in :)
