Thread: [RedDwagon Theme](#)

Immortal - August 11, 2011, 1:13 am

Well first off let me say this was a fun theme to make and to me it looks good. Now let me tell you a little history on how the name Dwagon started.

Me and my buddy Spencer were Hanging out Playing total miner forge for the first time we where in layer 700ish with all the lava and when the lava pops it makes a noise like a dragon flapping its wings and spencer bit into a molten hot pizza and burnt his tong and he hered the lava pop he said holy shit a dwagon, do to the fact he burnt his tong. We laughed so hard..

So when i seen this dragon

[img]http://www.veryicon.com/icon/png/Animal/Delightful%20Zodiac/Dragon.png[/img]

when looking for icons for my Program i decided i wanted to use it some way..

I was using teamveiwer theme by zero so i modded the colors and called it red dwagon and i said hmmh im gonna need buttons, check boxes panels ect.. so i made it all and i was talking to zero over Pm here at hf he said i should release it so i am!!

Here is what the theme looks like

I spent some time on this working the colors out

Credits:

AeonHack - themebase

xZ3ROxPROJ3CTx - His teamveiwer them and checkboxes

I guess my self for the rest of the work lol :D

so here is the pastebin <http://pastebin.com/5MK0isJR>

Future updates:

1 - Fix the bug

2 - Progress bar

3 - textbox

4 - more controls :D

5 - more darkness

Dawncore - August 11, 2011, 1:17 am

I think there is way to much red there. But otherwise good theme.

Immortal - August 11, 2011, 1:18 am

Wow, Thanks alot for all the supportive feedback i thought i was gonna get flamed for doing a recolor and not something more original....

I will do a more original version soon :D like i said this was alot of fun to do and Realy good for me to learn gdi with.

Banks? - August 11, 2011, 1:39 am

Immortal - August 11, 2011, 1:43 am

And Make a button and separator but hey look im new to Gdi this was my first experience.

deiski - August 11, 2011, 3:15 am

Ahh i knew this was a re-colour of this "TeamViewer" Theme.
Nice job otherwise.

Hell Guardian - August 11, 2011, 3:36 am

It's very good, I like it

Immortal - August 11, 2011, 2:06 pm

Yea and it's not even close to done lol that was 1/4th done now i got setback far with the 1.5 theme base update i need help moving the them around :(

Cherish Life - August 12, 2011, 7:25 am

The stripes look weird on that one, also i was never even able to use v1):...

And to be honest, i totally like v1 more than v2. v2 has that weird border on the icon and weird stripes, the panel looks weird, maybe it needs a grad but to be honest v1 looks better.

Immortal - August 12, 2011, 9:22 am

I removed the border around the icon te stripes are Okay but you can remove them by editing the code the release for that theme is here
