Thread: [Keyloggers doesnt work anymore :O](#)

gauthamnekk - August 11, 2011, 8:44 am

I'm using ardamax Keyloggers, When i try to send the .exe made with it to my friends, It always fails antivirus always detects it, Im done with it, Is there any solution to this?

Douchebag # 145 - August 11, 2011, 8:45 am

If you are done with it, what do you care?

Related: How about you learn some stuff and find out that malicious things should be crypted.

}{????? - August 11, 2011, 8:51 am

If you crypt it... It wont be detected as much. Thumbs up

gauthamnekk - August 11, 2011, 8:51 am

Give me any keylogger that doesnt get detected easily by avs

a crypted one

Douchebag # 145 - August 11, 2011, 8:53 am

LEAVE NOW. If you refuse to learn, you shouldn't be here. You don't even make an attempt.

}{????? - August 11, 2011, 9:02 am

<http://imgtfy.com/?q=Keyloggers+that+don%27t+get+detected+easily> Go there. It will show you one. thumbs up

gauthamnekk - August 11, 2011, 9:03 am

I just need one...I cant script everything from first Coz im newb, I need a premade one for a start, thanks

rtdt44 - August 11, 2011, 10:00 am

gauth i can crypt your server. Not free though... TEEEHEE

'Kevin - August 11, 2011, 11:03 am

Yes this is perfectly logical... if you're fucking retarded. You have to crypt it.
