Thread: [HideMyAss IP:Port Grabber\[With Source\]](#)

IIIBeBackSoon - August 11, 2011, 5:09 pm

I think I've seen plenty of these, but I was bored and on a break from re-creating "Simran Uploader" on a new host, because my old one was being a bitch and wanted to charge me \$146 to re-activate the account. During that time period I decided to make this. Took me about 20 min to make this work, and here's a video:

Video:

It uses a long Regex that I wrote, here it is:

```
Code (\d+\.\d+\.\d+\.\d+)\D+(\d{1,5})</td>\D+
(w+)<\D+"d+">\D+"width:(\d+)%"\D+"d+">\D+"width:(\d+)%"\D+<td>(\w+)</td>\D+"rightborder">(\w+)</td>
```

I'll break it down for you:

Group 1 returns the IP

Group 2 returns the Port

Group 3 returns the Country Image URL

Group 4 return the Country

Group 5 returns the Proxy Speed

Group 6 returns the Proxy Connection Time

Group 7 returns the Proxy Type(Ex. HTTP, HTTPS, etc.)

Group 8 returns Anonymity Level(Ex. Low, Medium, High)

Compiled - <http://simranuploader.com/dl/4e44b7f9b4646-HMAProxies.exe>

--Simran

eXero - August 11, 2011, 5:16 pm

Looks great Simran!!! :) I can't wait for the release.

Turmoil - August 11, 2011, 7:54 pm

You just gave me an idea bro, simran wan't to work together ?

IIIBeBackSoon - August 11, 2011, 9:04 pm

(Aug 11, 2011 07:54 PM)Turmoil Wrote: [\[CITE\]](#) You just gave me an idea bro, simran wan't to work together ?

Well, I basically done with this, but what's your idea?

Lol Y'all are funny. What did you guys have in mind?

I.V - August 11, 2011, 9:29 pm

Wow! This is very nice! On release, will there be source or just the program?

IIIBeBackSoon - August 11, 2011, 10:26 pm

(Aug 11, 2011 09:29 PM)I.V Wrote: [\[CITE\]](#) Wow! This is very nice! On release, will there be source or just the program?

Both :) Hope y'all like it!

Wtf? "The message is . Please enter a message longer than 50 characters.", I thought it 25 chars., I guess HF wants more HQ post.

Update:

Added Video, Regex Usage, Source, and Compiled Binary.

eXero - August 12, 2011, 7:29 am

You should have put the countries first Simran. I told you it would have looked better :)

Eternal Five - August 12, 2011, 7:32 am

Looks very good, how many pages of proxys does it grab?

Ghostenigma - August 12, 2011, 8:11 am

Good Work Simran!

I download the source and I will learn from it.

Thank You

no1me - August 13, 2011, 2:28 pm

tnx for the nice example (it can be improve) short

L'Arlequin - August 14, 2011, 6:35 am

Haven't you thought of saving those IP:Port's into text files? I guess that's the point of your program after all.

IIIBeBackSoon - August 14, 2011, 8:17 am

I had no intentions to do anything with the proxies. That's why I released the Source, and the Regex.

Nexeo - November 5, 2011, 2:19 am

Great tool. But there is any chance to reupload ? Your account is suspended ...

elguettaa3 - November 5, 2011, 2:46 am

Account Suspended :P ! Bad links :)

ayteh - November 7, 2011, 2:25 am

dead link pls update this... thanks

Nexeo - November 7, 2011, 2:38 am

I found this script, but it dosnt export links! try to search for something else!

namefag - November 7, 2011, 2:47 am

if someone wants to post a link to the source, (plz dont make me jump through hoops to get it since im trying to help) ill try and mod the app so it can dump ip:port to .txt

Superman² - November 8, 2011, 7:52 am

Enjoy

<http://www.mediafire.com/?jq4013xrydqzan0>

Also it is easy to export list as .txt just need to write it line per line while adding it to listbox (using Group 1 and Group 2) , I will post it if I can ;)

sillabub - September 11, 2013, 12:51 pm

i want source code

access denied :o

link deleted :D

look like good new site replacment for hma

nnc36 - September 21, 2013, 9:23 am

hey, why i can't download with this????

Photo. - September 21, 2013, 5:09 pm

Pretty nice, I must say.

Posting on here so I can bookmark this thread.

Sick, OP ?
