Thread: [MyBB Upgrade to 1.6.4 Completed](#)

Omniscient - August 12, 2011, 8:43 pm

The upgrade I now consider completed. If you see a bug you may now report it via this thread or a PM me to me.

There are no new features that members should notice. All changes are backend alterations that users should not be aware of.

So if you see a bug, error, or something out of place just LMK.

Thank you.

+Pirate - August 12, 2011, 8:43 pm

Thanks for telling us this Omni, And continuing to make HF better!

On that topic, there is still the "White loading bar" for quick replies.

[\[IMG\]http://i.min.us/jdHLWxX2C.png\[/IMG\]](http://i.min.us/jdHLWxX2C.png)

Omniscient - August 12, 2011, 8:49 pm

What what?

+Pirate - August 12, 2011, 8:50 pm

When you do a new message in the "Quick reply" box at the bottom, there is a white background, and not the HF colour- 33

Omniscient - August 12, 2011, 8:51 pm

Fixed loading bar. Anything else?

Turmoil - August 12, 2011, 8:53 pm

Sorry but this is off topic, the update doesn't effect any payments sent to you since its done manually right ?

carlos_matos - August 12, 2011, 8:55 pm

Yay, now to go find bugs!

Protector award plox. Kidding :)

Imperial Legion Soldier - August 12, 2011, 8:55 pm

Guests can view threads now. Permissions seem to be a bit glitchy.

Kyle FYI™ - August 12, 2011, 8:57 pm

Good to know, I haven't seen any yet, I will let you know if I do.

Omniscient - August 12, 2011, 8:58 pm

(Aug 12, 2011 08:55 PM)Imperial Legion Soldier Wrote: [\[CITE\]](#) Guests can view threads now. Permissions seem to be a bit glitchy.

That was fixed before I started this thread. Please confirm bugs are still active before reporting them.

2buckz - August 12, 2011, 9:00 pm

Glad to see you've finally got this up and running.

Imperial Legion Soldier - August 12, 2011, 9:06 pm

I can post in the Member of The Month. I created a [Quick Thread](#) and then junked it.

Sync™ - August 12, 2011, 9:06 pm

I'm glad that the upgrade has been completed.

I think this is a bug when rating a thread? When I rate a thread, the color scheme of the loading is white, while the old one is colored by our theme.

Spoiler ([Click to View](#))

Edit: This has been fixed. Thank you, Omni. <3

Brilliant™ - August 12, 2011, 9:07 pm

This has been a long time ago. Can it be fixed ?

Spoiler ([Click to View](#))

Jabbing - August 12, 2011, 9:08 pm

Still a problem when quick replying e.e I still get it.Eh, bug ?

iMario - August 12, 2011, 9:09 pm

Nice to see the upgrade complete! Here are two bugs.

<https://hackforums.net/showthread.php?tid=1595842>

<https://hackforums.net/showthread.php?tid=1595933>

Active - August 12, 2011, 9:10 pm

<https://hackforums.net/showthread.php?tid=1596247>

Should fix that , other than that i havent seen anything .

Vexes - August 12, 2011, 9:22 pm

It looks like I cannot edit my signature? Not sure if it's a sig ban (see no reason to be) or a bug.

WinA - August 12, 2011, 9:22 pm

nice probably explains why files couldnt be found a minute ago

Prominent - August 12, 2011, 9:56 pm

Not Found

The requested URL /index.php was not found on this server.

Additionally, a 404 Not Found error was encountered while trying to use an ErrorDocument to handle the request.

Apache Server at hackforums.net Port 80

I get those errors sometimes when I go to the website or try to view threads

WinA - August 12, 2011, 10:21 pm

Same but after a few f5 it works but some just dont even load

The MammoTh - August 13, 2011, 12:39 am

Good job omni, take some sleep your working to hard.

bullzye xxx - August 13, 2011, 2:05 am

when i click search button this appears up the top

MyBB Internal: One or more warnings occured. Please contact your administrator for assistance.

Angry Asswipe - August 13, 2011, 3:23 am

When I press "New Thread" the "MyBB Internet Error: One or more errors/warnings occured, Please contact your administrator for assistance"

Techie??? - August 13, 2011, 3:26 am

Nice upgrade. I will help to find bugs.

Omni and HF are HQ.

Aero - August 13, 2011, 3:34 am

I'm not exactly sure if this is a bug but I'm trying to post a thread in the Suggestions and maybe adding color or editing the text isn't allowed for some reason but it basically takes everything I wrote and deletes all of it except for the first line. When previewing the thread it works fine, I've posted it twice now only to see it fail and need to be junked. It could have just been this character "é" I removed it and it was fine.

When I was previewing it, this showed up at the top of the forum "MyBB Internal: One or more warnings occured. Please contact your administrator for assistance."

XiX Eb0y XiX - August 13, 2011, 5:31 am

"MyBB Internal: One or more warnings occured. Please contact your administrator for assistance."

Happens sometimes on replying and happens on creating a thread. Maybe exploitable not sure without investigating.

Zeon - August 13, 2011, 5:50 am

Omniscient is the the MyBB version that allows moderator userbars to show?

In?sane? - August 13, 2011, 10:06 am

Thats great, if i find any new bug i let you know.

Eminent - August 13, 2011, 10:16 am

Thanks for posting this Omni. You kinda left me hanging last time, since I didn't know what the update actually did. I'll assume it is a little bit better security/more features on your end.

EDIT: I actually found a minor error.

When you haven't rated a thread before, but you hover your mouse over it, the stars are green. Then after you rate it, if you hover your mouse over it, nothing happens, and it's unclickable. For some reason, after I have already rated a thread, on mouseover it looks the same as if I hadn't rated it. I clicked it and it said "You have already rated this thread". I don't know if this is new, or what the cause of this is, or if it's even a problem. Just letting you know.

Scooter - August 13, 2011, 12:05 pm

<https://hackforums.net/stats.php> does not work, simple just times out.

However, it may be just me.

Edit: Also, Drakon posted [this blank thread](#), may be a glitch because when I quote the thread, I can see the characters fine.

Diabolic - August 13, 2011, 3:21 pm

Hope to see most of these bugs fixed pretty soon, well done Omniscient on the new upgrade.

Omniscient - August 13, 2011, 4:01 pm

For now I've disabled our 2short plugin in order to review it and fix some of the bugs related to it.

Stats page is fixed.

Tarik_950 - August 13, 2011, 5:12 pm

Great work Omni. Finally a owner that takes care of his forum.

Diabolic - August 13, 2011, 5:20 pm

Most of the bugs are being fixed pretty fast, that's what I like to see. Well done Omniscient.

Jam2556 - August 13, 2011, 6:04 pm

Just wondering if MyBB 1.6.4 was worth the upgrade. I was thinking about upgrading my forum to it and seeing as it doesn't really bring any new features, is it even worth it?

Dr.BrokenGod - August 13, 2011, 6:13 pm

This is a minor one I am not even sure maybe it is my browser but I will post anyway.

When you/I click to arrange by lets say reply it all gets glitched:

[img]http://screensnapr.com/e/x0GHdr.png [/img]

Ghost? - August 13, 2011, 6:31 pm

Good work and keep it up Omni!

Glad to see us upgraded...

Diabolic - August 14, 2011, 4:44 am

Things are looking good, everything is getting back on track and as I said before most of the bugs are being fixed.

Liberty - August 14, 2011, 11:20 am

Ok i dont know if this is because of the update but this site is running really slow and many points in

time i cant connect to the site, Like i said i dont know if this is because of the update or some kid ddosing it. But there is a problem

AoEMonk - August 14, 2011, 11:21 am

Same as Liberty, I keep getting cloudflare errors and the site is really slow for me and my internet is fine.

Modestep - August 14, 2011, 11:26 am

Omni check my video, i had this problem, it was something weird with a thread, i recorded it.

<http://www.youtube.com/watch?v=MMX2tC0zXvQ>

EDIT, when as guest you go the the VIP area, and click the HF l33t subsection i got this message "You must login to view this page." on a white page, idk if this is normal.

fat n furious - August 14, 2011, 11:40 am

Every time i send a pm i get this:

Spoiler [\(Click to View\)](#)[img]http://nikheeren.nl/2011-08-14_18-59-25.jpg[/img]

This one too:

Spoiler [\(Click to View\)](#)[img]http://nikheeren.nl/2011-08-14_19-09-53.jpg[/img]

Oh and this one:

It says HF is offline and i'm running offline mode a lot of times, but that's probably normal

010100111001 - August 14, 2011, 1:56 pm

Some images aint loading, I think its cloudflare caching

when I try and load the image directy it says

VIRUZ™ - August 14, 2011, 1:58 pm

I like the sound of the backend alterations sounds nice :D

fat n furious - August 14, 2011, 2:25 pm

oh and this one, never noticed b4:

Spoiler [\(Click to View\)](#)[img]http://nikheeren.nl/2011-08-14_23-21-40.jpg[/img]

Omniscient - August 14, 2011, 2:39 pm

You're talking about something besides the MyBB upgrade. Don't go off-topic.
