Thread: [\[MyBB\] Moderation Tools Select \[Plugin\]](#)

Xerotic - August 13, 2011, 4:15 pm

I created a simple plugin for Moderators on MyBB forums.

This gives Administrators the option of specifying a certain option to be selected in 'Moderation Options' and 'Inline Post Moderation'.

For example..

This is how it would normally appear:

Now with my plugin, you can specify it to show something else as default:

You can find the official release page at the following link:

<http://www.mybbcentral.com/thread-7229.html>

If you have any problems with it, please contact me.

Thanks.

xerotic

Thank you, I appreciate it. I have been looking for bugs, still have to find one. I have some things in mind I may be able to fix in a later release.

Damdomy - August 13, 2011, 4:38 pm

Since i'm not yet subscribed, can you upload pictures here? Because I don't really know what this is.

I like the look of this. Hackforums has this in place i presume ?

Good work.

xViper - August 13, 2011, 4:50 pm

Hey there,

So you mean this lets you change the default option that is selected?

Thats a good idea, nice!

Xerotic - August 13, 2011, 4:50 pm

Exactly what it does! And thank you :)

Mr Kewl - August 13, 2011, 4:55 pm

This will be helpful for adding custom moderation tools.

Thanks downloading. <3

Damdomy - August 13, 2011, 5:00 pm

Looks awesome :D

Although how are we gonna specify each action? Code it?

What do you mean?

Damdomy - August 13, 2011, 5:07 pm

Let's say i want the moderator to split the reply, or maybe add a reply for another user, will i have to code it for it to work?

Xerotic - August 13, 2011, 5:08 pm

The Moderation Tools already have a default set. There is also customization already available in default MyBB Admin package. My plugin simply focuses one as the pre-selected option.

Oh, i understand, well i'm subscribing soon and will definitely give your plugin a shot,

Thanks.

EDIT---

Just realised the plugin was free -.-

I will try it now :D

Excellent! Please give feedback and any errors/bugs you have :)

Damdomy - August 13, 2011, 5:53 pm

Hmmm... What do you mean by "Moderation Tool ID"?

And "Inline Moderation Tool ID"?

Xerotic - August 13, 2011, 7:11 pm

Plugin updated. Thanks for mentioning that. I decided to make it easy for the admin :)

!!##UPDATED##!!

Alright guys, I changed the plugin around a bit to make it a lot more user friendly. I included a drop down box for all default Moderation Options.

Picture of it in AdminCP:

I think this will add some ease to the plugin ^_^

The file at [MyBBCentral](#) is updated.

Damdomy - August 13, 2011, 8:21 pm

Yup much better :)

Updating my current one.

Thanks.
