Thread: [Want to know if you can jailbreak YOUR device? Click here!](#)

D3xus - August 19, 2011, 8:09 am

Do you own an iDevice running a software version older than 3.1.3?

If so, please upgrade to the newest available version for your device unless you are running an iPad 2. There are jailbreaks for all devices on the newest firmware except for the aforementioned device.

Do you own an iPod 1G, iPhone 1G or iPhone 2G running software version 3.1.3?

If so, you can jailbreak your iDevice with a program known as Spirit created by Comex, as the most recent version for those devices is 3.1.3 and Spirit jailbreaks those firmwares. You can download Spirit from [here](#).

Do you own an iPod 2G, 3G or an iPhone 3G, 3GS or 4 running version 4.0, 4.0.1 or 4.0.2?

If so, you can jailbreak your device with JailbreakMe 2.0, (located at <http://jailbreakme.com/star/>) sn0wbreeze or redsn0w. Please upgrade to the most current firmware for your device, 4.2.1 which has an untethered jailbreak. Refer to older and archived versions and do not use the most current releases as they will not support this firmware (with the exception of greenpois0n, as it is at the most updated version.)

Do you own an iPod 2G, 3G or 4G or iPhone 3G, 3GS, 4 running version 4.1?

If so, you can jailbreak your device with limera1n, greenpois0n, redsn0w or sn0wbreeze. You can find the developers websites with Google. Refer to older and archived versions and do not use the most current releases as they will not support this firmware (with the exception of limera1n, as it is at the most updated version.)

Do you own an iPod 2G, 3G, 4G or iPhone 3G, 3GS or 4 running version 4.2.1?

If so, you can jailbreak your device with greenpois0n, redsn0w, sn0wbreeze or PwnageTool. Download links can be found on Google. Refer to older and archived versions and do not use the most current releases as they will not support this firmware (with the exception of greenpois0n, as it is at the most updated version.)

Do you own an iPod 3G, 4G or iPhone 3G, 3GS or 4 running version 4.3, 4.3.1, 4.3.2 or 4.3.3?

If so, you can use JailbreakMe (the easiest to use,) redsn0w, sn0wbreeze or PwnageTool to jailbreak those firmwares. Refer to older and archived versions and do not use the most current release as they will not support this firmware.

Do you own an iPod 3G, 4G or iPhone 3G, 3GS or 4 running version 4.3.4 or 4.3.5?

If so, you can use redsn0w or PwnageTool to perform a tethered jailbreak, meaning you will have to use a program to manually boot the device every time you restart the device.

Do you own an iPad 2 running software version 4.3.3?

If so you can use JailbreakMe to jailbreak your iPad 2. Other iPad 2 versions are incompatible with JBMe 3.

Do you own an iPad 2 running software version 4.3.4 or 4.3.5?

If so, you cannot jailbreak your iPad at the moment. Stay tuned for more updates.

Do you own a Verizon (CDMA) iPhone 4 running software version 4.2.5?

If so, you can use greenpois0n to jailbreak your iPhone.

Do you own a Verizon (CDMA) iPhone 4 running software version 4.2.6, 4.2.7 or 4.2.8?

If so, you can use JailbreakMe, redsn0w, sn0wbreeze or PwnageTool to jailbreak your iPhone 4. Refer to older versions of the 3 latter programs as more updated versions do not support the aforementioned versions.

Do you own an Verizon (CDMA) iPhone 4 running software versions 4.2.9 or 4.2.10?

If so, you can run tethered jailbreaks with redsn0w and PwnageTool (the most updated versions.)It took me 2 days to complete this but only 5 seconds to say thank you! :)

robife - August 19, 2011, 8:13 am

Nice tuto and thanks you

I jailbreak my Iphone4 version 4.3.3 easiest way I visited website!

<http://jailbreakme.com> and wops it was jailbroken

WCKicksAss - August 19, 2011, 8:13 am

Ipad 3?,

I just used Jailbreakme but I got errors with cydia.

I wish I can unjailbreak without having content deleted though

INCREDIBLE - August 19, 2011, 8:15 am

OP is a HQ poster .. He do post informational tuts to help users around here.. Nice

This part is incorrect:

Do you own an iPad 2 running software version 4.3, 4.3.1, 4.3.2 or 4.3.3?

Only 4.3.3 is jailbreakable throughout JailBreakme, i tried to do it on earlier versions before 4.3.3 and it said my device wasn't able to utilize the website.

Also a bit of spacing between the sentences would improve the reading a lot.

For the rest it's pretty handy for people who don't know much about Jailbreaking, good job. :)

iRun - August 19, 2011, 11:32 am

Quote:Do you own an iPod 2G, 3G or an iPhone 3G, 3GS or 4 running version 4.0, 4.0.1 or 4.0.2? I though you can't use 'Star' on 4.0.2, doesn't 4.0.2 block the PDF exploit?

D3xus - August 19, 2011, 1:09 pm

I'll fix all that now. Thanks for pointing it out. And for 4.0.2 you still have redsn0w and PwnageTool.

Døn - August 19, 2011, 2:52 pm

Great Job Dexus, I really like it!. Maybe you could add CDMA devices also :)

D3xus - August 19, 2011, 3:48 pm

THREAD UPDATED WITH VERIZON CDMA IPHONE MODEL

Døn - August 19, 2011, 7:31 pm

Thanks man, this should help everyone! Also, thanks for adding the CDMA devices; I am for sure

people would have asked

AlooshXD - August 22, 2011, 11:00 pm

when they will release the untethered jailbreak for 4.3.5 :/ ??!

D3xus - August 30, 2011, 11:51 am

[img]http://www.sinfuliphone.com/sinfulss/smilies/.gif[/img] Lol, the picture had the word bum p in it so the forum censored it out and fucked the pic.

(Aug 22, 2011 11:00 PM)AlooshXD Wrote: [\[CITE\]](#) when they will release the untethered jailbreak for 4.3.5 :/ ??! I don't think there will be one. :(

supeirman - August 30, 2011, 1:32 pm

wow this is nice cant wait to try this out .

D3xus - September 4, 2011, 4:58 am

Thanks. When the newer devices come out I'll add them here.

KEoJin - September 7, 2011, 5:44 am

Seems like Apple killed untethering in since iOS4.3.4, therefore there will be no more jailbreaks (probably).

Inventor - September 7, 2011, 6:46 am

There is always a high chance on a tethered jailbreak.

KEoJin - September 7, 2011, 10:29 am

(Sep 7, 2011 06:46 AM)iChris Wrote: [\[CITE\]](#) There is always a high chance on a tethered jailbreak. Oh sorry, I mean untethered jailbreak, thanks for reminding!

Bob Ross - September 7, 2011, 6:46 pm

Really, really helpful. I was honestly curious about all this since kids around my school want their iPods jailbroken. This gave me everything I needed.

Thanks. :)

D3xus - September 19, 2011, 5:40 pm

I'm posting so other people can see this thread. It's very useful.
