???Stop DOS or DDOS Attack(LINUX)-A Script [TUT]???
[A Stopping Script]

If you are under a DOS or DDOS attack u don't know what to do then use this script to get the solution of this situation

Step 1:-

Pastebin Link

[Download Here](#)

Step 2:-

Run These Commands

Code service apf stop

iptables -F

chmod u+x Anti.sh

./Anti.sh

Thanks 4 being Here

This does stop ddos attacks, but also fucks with your ports and so.

I don't think so

Becoz When u run this Script then u must stop your Firewall service

Well what's the point to run this script if you have to stop your Firewall?

You can set some rules in your firewall to block DDoS attacks so no need for this.

Anyway, is this confirmed to work?

Is the script plain text shell command? If so why not post it somewhere like pastebin?

-ThatGuy- - September 3, 2011, 2:38 am

Thanks , maybe i will need that sometimes.

Dear Omni

Itz a shell Programming language so I can't take a risk to upload in pastebin becoz copy/paste will suffer some problems in future.

So that's why I uploaded it on Mediafire

That stop DOS attack :)

So when now most of lamerz don't have BOTNET, this is very usefull.

AtLeast - September 3, 2011, 3:02 am

I will try, because i think i am dosed, internet works wired only .

maxw30 - September 3, 2011, 3:24 am

Im a nooby of this although how do i run the script lol?

windows powershell? :S
