Thread: [how do you transfer victims?](#)

Sslick - August 16, 2011, 10:04 pm

Title says it all , would someone care to show me please?

Nawk - August 16, 2011, 10:06 pm

To another RAT? I just have a separate DNS on the new RAT and update my installs.

Idk what that means, my friend wants to send me his victims.

yes we both have dark-comet

Choose the victims you want to transfer to your friend, execute (hidden) and send them your friends virus

wait, so If i where to send my friend a victim. He would execute (hidden) then send me the virus? im so confused.

freezia - August 16, 2011, 10:13 pm

PM me your teamviewer details and i'll show you how its done okaii???

Sslick - August 16, 2011, 10:16 pm

I don't have any victims on atm. He's going to send me one.

Wheelz - August 16, 2011, 10:29 pm

Give your friend your server and he can upload it to all his victims computers, then you will have all his victims

Douchebag # 145 - August 16, 2011, 10:31 pm

Upload your RAT to fileave.com, give the link to your friend, have him Download/execute your server on his bots. If your server his FUD, you should get most of them. :D

Pay some one a dollar for a crypt. That is what I do as I don't have a personal crypter.

spikebites - August 16, 2011, 11:04 pm

You guys are all making this too complicated.. The easiest way for you to get all of your friends slaves is to have your friend login to his NO-IP from your house or teamviewer it, and have it redirect all his servers to YOUR IP. So everyone connecting to his NO-IP will go to you.
