Thread: [\[Free\]\[Auto-Pilot\]\[100's of Bots\]Newest Easiest Spreading Methods](#)

xbITeddy - August 17, 2011, 11:34 am

This method is Yahoo Chartroom Drag And Drop Method, which i think i may have came up with. all the other methods for yahoo require you to talk to each individual Slave. IT IS SEMI AUTO-PILOT. You will get hundreds of bots if you do this an hr or 2 a day

* MAKE SURE UR SERVER IS FUD TO GET THE MOST BOTS AS POSSIBLE.

What will you need to do?

1. Signup To Yahoo[CLICK HERE](#)
2. Download Yahoo Messenger (US Version)[CLICK HERE](#)
3. Make Your FUD Server (Use a Crypter from Hack Forums, Search for one). [CLICK HERE](#)
5. This will teach you Spreading.
6. Little Brain

THIS IS THE YAHOO CLIENT:

PERV NAME:

GOTO FILE AND CLICK JOING YAHOO CHATROOM

THIS IS THE CHATROOMS LISTED, PICK FROM ONE
Recommened rooms:

goto asian marketing chatroom, romace chatroom or regional and pick Asia or China (these have the most people willing to download from strangers).

This will pop up, click it and it will bring you to captcha page.
Fill that out and exit the webpage, you will now be in the room.

Captcha:

NOW HERES WHERE THE FUN BEGINS! AND IT IS SO EASY.

1st Step. Rename your picture to Naked.exe or something like that.

2nd Step. Drag and drop you file into the part where you type.

You'll see that and you know it worked.

3rd Step. Watch people download the file.

30+ bots in Under 5 mins. FOR JUST DRAGING AND DROPPING A FILE.

4th Step. Check your Rat, DDoSer, Stealer, Keylogger etc.. Fill up with Slaves/ Bots !

THATS IT. YOUR DONE.
