I totally agree, I was like WTF. This is an obvious and very poor attempt at trying to get sharecash downloads. Surely this thread should be removed should it not? Why would a crypter be 30mb and have the wrong dependencies from a guy with negative rep and hardly any posts.

Yea.... The Post is false. Why did the OP take time to make that banner? I think he just tried to Spread ^^

d3xtaz - August 19, 2011, 12:07 pm

I need to go through proxy to access these forums, sadYeah. It sucks that HF bans countrys
(example, my very good friend from turkey can't access it). And the LU VPN I'm using is banned too
(country), so I use the vpn plus a german socks5.
