Thread: [\[Theme\] YouTube Theme](#)

Perplexity - August 18, 2011, 5:28 pm

I got bored so I decided to work on a new theme since I haven't made any in a while.

If you looked at my other themes, you'd notice they're pretty much all the same except for different colors.

This time, I tried something new :3

I based this off of YouTube's Red/White scheme.

Suggestion : For the button if possible try and make it like the oval thing in the Logo. So it's more YT related.

The grads are a bit to overdone and the red is... "to bright" but overall I still like it.
Good job.

Derp.

It's not supposed to look like YouTube, just the same color scheme.
