Thread: [\[Tutorial\] RAT Spreading/Keylogger Guide \[Tutorial\]](#)

Milky Gum Shot - August 19, 2011, 7:58 am

So, I saw an earlier guide on how to do this, but it was the internet ways, and how to set the Darkcomet/Cybergate, etc up. So, here we go :) Guide Link: [Other Guide](#)

Items needed:

- 360 or PS3 [Live/Network]
- Controller
- Cybergate/Darkcomet set up
- [Keypad] For 360 Controller <--- Not totally necessary!
- Server.exe is created
- A Brain

Step 1:

For the xbox 360 people are always in desperation for the, "Microsoft Point Generators" So what you do to begin the process is have your Cybergate or Darkcomet start up and build your server, then name it MSPointGenerator...<-- or whatever you want!

For the PS3 people want the "PlayStation 3 Network Card Generators" Build another server and begin to name is PS3CardGen. <--- or whatever you want.

Step 2:

Begin to make it FUD (Crypted/FullyUnDetectable)

Right click it and hit add to Archive, then click zip file.

[img]<http://i1217.photobucket.com/albums/dd388/marines476/Untitled.jpg>[/img]

Program I use: <http://www.mediafire.com/?hbgt46aze8sxmvi> <-- Pedro posted the scans. If you don't trust dont download its just that simple...

Now upload to [Mediafire.com](#) <-- MegaUpload causes people to RageQuit. And we don't recommend that.

Copy the link and put it in notepad, or just remember the link...

Step 3:

Turn on 360 or PS3 and play highly populated games like:
MW2 - BlackOps - etc.

Play 3 games of ground war then exit and create a message!

Its going to be a text message and send message to people on your, " Recent Players " <-- etc. Edit recipients and click all the people other then your friends...

In your message say something like:::

"Microsoft had an update and MSPoint codes are being leached all over, use this program to get your free 1600 codes. [MediafireLinkHere]"

"PlayStation Network was hacked in the past and the codes for the cards are still being leached hurry before the next patch, [MediafireLinkHere]"

Step 4:

Wait, check your email for notifications, check Cybergate/DarkComet/etc.

Its not as detailed as other spreading methods but its good if you own an Xbox/PS3 also.

AV SCAN of ZeroBount

<http://www.virustotal.com/file-scan/report.html?id=952eeafc6ae363785797e63896221f7ca4da90413c53bc946b5567c18cdbee65-1313765820>

ANUBIS SCAN

http://anubis.iseclab.org/?action=result&task_id=16ecbff355c2acbc4c5fa2eefc3a26f89&format=html

Suspicious for me.

rtdt44 - August 19, 2011, 8:24 am
dude dont fucking spread on hackforums you peice of shit.

Anyway i am making a compilation vid of me spreading on adult chat sites... i am a dude... hacking guys who want to see naked women... im hacking them so that when they do... i will. lol.

Milky Gum Shot - August 19, 2011, 8:26 am
Lol nice. And spread? I forgot to upload scans Im sorry.

killermindhacker - September 5, 2011, 2:16 pm
AwesUM MAn...!! U really got Gud tutorial...!! Loved it and Thnx for it

Milky Gum Shot - September 5, 2011, 3:57 pm
Ur Welcome MindHacker :D It took like a half hour to make it not even, so the thanks are welcome... :D

Shlazam - September 5, 2011, 4:14 pm
solid tutorial this should help alot of people get some slaves.

Ups. - September 5, 2011, 7:42 pm
Nice tutorial but you guys should not go with Microsoft Point Generators most people know that it is fake and it is a virus. You should say it is a patch viewer for Ps3 mw2 and black ops for xbox 360 say it is a patch maker for black ops or something like that.

Milky Gum Shot - September 5, 2011, 7:44 pm

Nice job on introducing that UPS, I think it should be anything really realistic, it could be a hidden update also :D

msroflcat - September 6, 2011, 8:18 am

you can do this on pc/mac using steam too? becoz i dont have a ps3 or xbox :O i only play pc :P

nvague - September 6, 2011, 9:03 am

Nice tutorial, thx bro

Yes you could also do this on the PC. I think the PC would be a BRILLIANT idea over games, like MW2 PC and Project Blackout(buypoints etc) So many possibilities on the Mac/PC.

kickerbat - September 6, 2011, 10:05 pm

You can do it on anything, Its just called common sense. This isn't really a tutorial, All your telling people to do is spread on XBL and PSN.

Milky Gum Shot - September 7, 2011, 9:23 pm

Kickerbat so is every other tutorial.

E-Whoring how to redirect perverts to buy ur fake pictures

LOL thats what guides are for.
