Thread: [\[TUT\] DarkComet 4.0 Port Fix! \[FIX\]](#)

LiteFire - August 20, 2011, 9:53 am

Hey everybody, I think a lot of people are having troubles with this problem.

If your getting an error such as this:

[img]http://dl.dropbox.com/u/28351832/port2.JPG[/img]

Then I think I can help you.

First step, when setting it up make sure you chose a Security Password:

[img]http://dl.dropbox.com/u/38811053/ss1.png[/img]

Then click Settings and make sure you type the same password in for Traffic encryption merged key (password):

[img]http://dl.dropbox.com/u/38811053/ss2.png[/img]

Close that out and re test your settings. I think it should work. Worked for me.

Harold_Finch - August 20, 2011, 10:02 am

Thank you I will try this I hope it work !

Dizzy Wright - August 20, 2011, 10:05 am

I tried doing this, but it didn't work for me.

Antman - August 20, 2011, 10:05 am

I tried this and still have no luck..Dark Comet 3.01 works fine for me though.

Prince Rajput - August 20, 2011, 10:07 am

Hmmmm i was face same problem... guys what port u wanna set 1st of all start listen that port then test port configure with your no-ip account :) i know i will help you out..cheers !!

fir3wall k1ller - August 20, 2011, 10:26 am

I got this error too but then i set the port to listening ex(1604) and it works!

expenaticx - August 20, 2011, 5:05 pm

thanks dude ,, not working for me too :(

necdet_87 - August 20, 2011, 5:52 pm

thank you my friend but not working for me too =(

WinA - August 20, 2011, 6:00 pm

works fine just use old settings like 3.3

theshiningeagle - August 20, 2011, 6:34 pm

WTF! Not working with anyone T_T
except me :P thanks dude it works
