Thread: [Account Hitman v0.5 Beta - Bruteforce Like A Pro!](#)

Pomidorro - August 20, 2011, 2:42 pm

Description:

This is an all in one bruteforcer.

It can be used as a simple cracking tool if you're a basic cracker, or a powerful cracking tool if you learn how to use it.

Version 0.5 BETA --> because some things are not complete yet.

I didn't make it.

I leached it :P

Have fun.

Omnion - August 20, 2011, 2:55 pm

god damn i hate leechers fuck off nublet

?3? - August 20, 2011, 2:56 pm

A virus scan would be nice on hear bro please.

~!White!~ - August 20, 2011, 2:56 pm

ima guess this is backdoored like the other leached program

D3M0N23 - August 20, 2011, 3:06 pm

leached and outdated

[sarcasm]GJ dude GJ[/sarcasm]

This file is 100% infected! I scanned the exe and it contained a Trojan on virus total. If you downloaded this you may want to check out the white hat section. =P

section. =P

U can post proof because i scanned it and i saw 1/43.
So sorry it isn't infected.

iMoney - August 20, 2011, 3:39 pm

Please Put a virus scan or people will doubt you

The Zodiac - August 20, 2011, 3:47 pm

I'm checking it now

I'll let you know in a few minutes

Are you dumb? If its 1/43 its infected, fuck this I am doing an Anubis scan, then we can all see =P

http://anubis.iseclab.org/?action=result&task_id=1ffdd979e3e8c5e9419dd8b4fe9754124&format=html
!

Infected!!!! there is two times the proof, so sorry it is infected you fucking infected link cunt!

The Zodiac - August 20, 2011, 3:58 pm

http://anubis.iseclab.org/?action=result&task_id=1aef0319b1d665ab41da8b0a23ea3249c&format=html

it's hard to say weather or not its infected because its an installer and not just an executable

and just because its 1/43 doesn't mean its infected

but at the same time 1/43 could be infected

this is why you test in sandboxie because online scanning won't tell you if a hacking program is infected because it's a hacking program

it will come up as a positive anyways

Shaggy Rogers - August 20, 2011, 4:01 pm

Write to foreign memory areas: This executable tampers with the execution of another process. high

Autostart capabilities: This executable registers processes to be executed at system start. This could result in unwanted actions to be performed automatically. medium

Execution did not terminate correctly: The executable crashed. medium

Spawns Processes: The executable produces processes during the execution. low

Performs Registry Activities: The executable creates and/or modifies registry entries.

This shouldn't have auto start shit, likes a virus does

solomon271 - August 20, 2011, 5:56 pm

it looks like a good tool, i will try it

thanks for the post :D

Pomidorro - August 21, 2011, 2:48 am

this is not a virus.

I tried it on my own pc and i ran a virus scan afterwards.

I got this from hackforums.net.

Prince™ - August 21, 2011, 3:03 am

OMG leeched it from other forums? xD ..

NOS666 - August 21, 2011, 3:55 am

Great job ! I test that today ! :) i hope it's work

Figma - August 21, 2011, 6:53 am

This is 100% real. sorry but i ran it and didn't got hacked.

+Repped.
