Congrats bro, I am also an Indian, and feel good :)

FAIL

The main page is still up yo. And what is up with people being like, "Yeah, Indian pride!" Like you represent your entire country or something. You think all of India is bustling with pride because you hacked the jailhind.htm page of an animal shelter? Get some high level targets going. Now if you started hacking the Pakistanis, then I bet a lot of people back in India would be like, "Yeah dawg, show those mater chodes who is boss!" I suppose you can do random hacks out of boredom, but just seems something really mean to do on

a animal shelter. I got my dog from one. . . .

Well, you didn't actually make the deface page so i won't say it looks good.
It's plain in the source unless i'm missing something.
