Fission is a custom VB.net theme coded using

GDI, meaning the GUI seen above is created using only code. At the moment, Fission is the only theme available to offer this much customization.

All buttons have the options for icons (never before heard of for sale), as does the theme form. Custom text-boxes, and tab-controls, are both included with full purchase, and are both never seen before in a custom theme.

Every aspect of the theme is customizable, save for the shape. Every color, font, and image is changeable and exchangeable to give the end-user the best experience possible.

want the theme, please buy it. It is only \$15 and it goes towards me making sure I eat.

Sorry,

Vouch for xZ3ROxPROJ3CTx

legit seller ?

Good Luck on sales!

Immortal - August 21, 2011, 2:23 am

Wow Epic i have seen your theme through the development process I vouch 100%

?eumonic - August 21, 2011, 2:30 am

Glad you like it! I hope that it goes somewhere. If not, I will just sell it to a private dev.

deiski - August 21, 2011, 3:41 am

I think it's a bit silly to buy a theme, Don't know about anybody else's opinions.

Good luck with sales x3

How so? It is just like any other VB.net project created? This one is just designed to be used for another VB.net project. It's not like it is any less difficult to code a theme, as it requires an idea, the know-how to implement the idea, and an efficient way to create said idea.

A lot of work goes into themes and that quote makes you look rather arrogant, with all due respect. It shows that you don't quite fully understand or appreciate the difficulty of coding.

I totally support the free work you release, and I like all of your Themes. So yeah Im buying this now.

Good job Zero, it looks great.

Thanks! I am glad you like it, and I may start releasing free themes again, but they will not be as near as complete as my other work. Sorry to disappoint you.

images aren't showing for me, re-upload?

Mortalis Piratica - August 22, 2011, 1:50 am

I can easily by pass the payment because BuynSell is a shit but no, I wont because I'm not the ass hole. ^_^

asillychilly - August 22, 2011, 8:46 am

xZ3R0 read the private message I've sent you. I've ran into some problems with the theme.

EDIT: Its been just about 2 days, and I dont seem to be getting any reponses to my queries let alone support. Havent been able to use this theme once.

Will edit this if I get support.

Doctor07 - August 22, 2011, 3:28 pm

Vouch for Zero, His themes are amazing and efficient and quite a bargain!

Immortal - August 22, 2011, 8:59 pm

Wow this needs a now zero when i get my free copy xD

asillychilly - August 23, 2011, 3:24 pm

Alright it's been 3 days, and no answer from Z3R0 or any sign of support.

He's been online though, and is ignoring my PM's most likely.

I sent a reply to your PM. If you need further assistance, add me on MSN at xz3roxproj3ctx@hackforums.net. I never ignore requested help with my themes. I was wondering why you didn't get back to me.. :P

Actually you did when I need your help in making that CODEDOM crypter.

I said when it came to my themes. And I didn't ignore you, I sent a PM. But if I don't know the content, I can't help with it. :P

Vouch for Zero. Great guy and a God at making themes :) You already know what to expect from him,

Good luck with sales dude. I know you worked hard.

?eumonic - August 25, 2011, 12:30 am

I did work hard. And with users like ProWebHosting exploiting UploadNSell, I am no longer going to be creating Auto-Buy themes. I will now sell on a case by case basis. He decided that \$0.01 was enough to pay for my theme.

@ProWebHosting: you are a dishonest user and will no longer be allowed to purchase any of my themes. I hope you are happy with your decision.

@All: If you are interested in purchasing any more of my themes, I will require you to PM me. You can thank ProWebHosting for this decision.

Integrity™ - August 25, 2011, 12:36 am

Couple friend's say he's done it before....I'd watch out for him, and lets hope uploadnsell fixes this.

Mortalis Piratica - August 25, 2011, 12:39 am

Like I said I was just checking the tutorial that was posted by a guy. I already knew that this wasn't working. Really I never wanted to happen something like this.

The point is not that you accomplished it, but that you still tried to attempt it. It shows that you do not value the hard work I put into this enough not to attempt to exploit me. I am not going to be removing my reputation rating any time soon, solely because I do not feel you deserve to have it removed.

I hope that you reflect upon what you have done and learn from it.

I will buy this once you add support for C# code :)

Or maybe, just let it compile it to dll's.

That, or I could compile it myself.

I insist that you purchase it. I will try adding support for C# to it later.

I will most definitely have it implemented for my next premium theme.

I hope that Zero don't mind me helping his thread up a little. And also, I strongly vouch for this guy. He has been making quite a few awesome themes.

Ace of Spades - September 13, 2011, 10:07 pm

Just bought it, holy shit dude this is freakin epic. O_O Thanks a ton! :D
