Thread: [How to take Admin Ownership of a file?](#)

Skouti - August 22, 2011, 8:21 am

Hey guys I would like to know how I can take full ownership of a file folder.

I know the cmd method takeown /f filename and the properties>security edit etc,I have tried these but I haven't any sucess taking full ownership of the cybergate rat.Any other way to take ownership?

See this thread: <https://hackforums.net/showthread.php?tid=978746>

It should provide you with instructions on how to take full ownership of a file :)

Golliath808 - August 23, 2011, 6:40 am

1st: takeown /F C:\windows\file.exe

2nd: cacls C:\windows\file.exe /G %username%:F

Thats it:),works on Vista/7.

If you want,I can tell you how you can block files too like this, to protect your files like a system file :)
