Thread: [HF error when i try to connect to hack forums, http server is normal.](#)

Lover200XD - August 22, 2011, 12:22 pm

Hello everbody, i have a error everytime i try to connect to hackforums.

It says: " Http server is normal "

It never goes, does someone knows the solution of this? I am connecting with a proxy ATM.

Thanks!

~~Cali

You might have been fire walled.

Please take your time to use the contact page, which can be found here:

<https://hackforums.net/contact.php>

Choose "Fire walled" and write your IP Address.

Good luck.

Remove any entries HackForums entries in your hosts file.

Access Hosts File:

Run Notepad as admin and search for "hosts" in this order.

Code C: > Windows > System 32 > Drivers > Etc > hosts

It's odd beause I'm experiencing some difficulty when connecting to HF as well, however it works just fine on my iPod.

Sasori - August 22, 2011, 5:40 pm

Never see that error, but for the past hour or two Hack Forums has been loading really slow for me. My internet is fine.

Omniscient - August 22, 2011, 6:00 pm

It's your DNS. Follow the help instructions in post #3.
