Thread: [\[Source\] VB.Net Troll Mouse Maze \[Game\]](#)

Chappie - August 22, 2011, 10:06 pm

I made a basic Mouse Maze game and i will give the Exe and the Source, Don't complain about me not doing a virus scan because i provided the source.

Source: <http://www.mediafire.com/?b2b1eyuy3bxz8zv>

Exe: <http://www.mediafire.com/?1aezye7aedq5nga>

Hope this may help someone who is new to making games on Vb.Net out there :D

Looks Great!

Thanks for the source man, would love it... :)

Isn't this code in the MSDN learning center for anyone with VS 2010 Express to download?

If so ppl need to stop copy/pasting for basic things, get a mind/memory of your own.

If not then carry on and good job pz. - BrU

Nah, i wrote this my self..

Its not a complex game to make so i assume coding for it seems very similar
