Thread: [\[TUT\] How to make a task manager](#)

FileX - August 24, 2011, 3:46 am

I was bored and I looked on HF and I didn't see a tutorial for the beginners on this so here it is.

You need:

- a listbox
- 2 buttons

You put them like this: 

First we have to make a function to get the processes:

Then we have to make a function to kill the processes:

Now we put in button1_click GetProcesses() to show the processes in the listbox.
In button2_click we put KillProcess() to kill the selected process.

Finally it will look like this:

vulnerbler - August 24, 2011, 3:53 am

nice , um sure begginers will like that ..., easy for understand to them

Chunked - August 24, 2011, 3:55 am

It would be useful to post the codes imo. :)

Gone-KaPPaH - August 24, 2011, 3:55 am

Thanks bro this will really help me for future projects :D

If you type, you actually see the code, and don't just make GUI, c+p, done.

If you see the code, you study it and you learn ;)

My apologies, Chrome was doing weird =/

I'm glad it helps you.

trueidol - August 24, 2011, 4:21 am

Real nice and simple real easy how to make a task manager

Gone-KaPPaH - August 24, 2011, 4:53 am

I would like to recommend having the code to get processes in form load alot easier

Vaxorr - August 18, 2013, 5:15 am

good tut i maked mine with this tut :D

Also a nice gravedig, only few years. ?

DaChosenOne - August 18, 2013, 1:26 pm

Well its not bad but i know better ways.
/Msg2Short.

Scifen - August 22, 2013, 7:20 pm

Confusing, don't where to put put the codes and not explained well.

Tut rate: 2/10

- 1) Grave-digging
- 2) Really dumb
- 3) GTFO and don't come back
- 4) Have a nice day :)
