Their are a few public but most are private ones that I purchased, but now giving away due to not owning a booter no more. Please shut up if you do not know what you are talking about.

Complete bullshit.

I don't know why I even did your shitcash link. All of them are public can be easily found on pastebin.com. Tons of doubles. Although I thank you for the huge list of public shells. It took me about 20 minutes to get the stupid shitcash to work, I could of found this same amount but probably actually working in about 5. QQ

and after testing them all, only 32 of them are online.

?

Uhh actually we don't. You see when we do a survey they send a text message to us. When we get the text message we get charged. (Not everyone has the luxury of having unlimited text messages, even phones nonetheless.)

Free != Charged

Think about that for a second.

Time is money.

Doing survey takes time.

Doing survey means spending money.

Not free.

Brutal Chaos - September 15, 2011, 10:14 am

The survey actually unlocked the content for me this time, going to check the shells now, thanks by the way it only took 2 seconds.

Got 52 working ones out of the list, better than nothing though.
