Thread: [2nd XSS found on major websites](#)

_DeNy - August 25, 2011, 5:11 am

Well, this is the 2nd permanent XSS vulnerability I have found on a major website.

The first site was steamcommunity.com on group pages. I have no existing proof of that except a thread and people who can vouch for that existing.

The second is ShitCash. [http://\\$harecash.org/download.php?file=2253997](http://$harecash.org/download.php?file=2253997)

I'm happy. :)

The MammoTh - August 25, 2011, 8:34 am

I am happy for you because you are happy. :).

i dont want to open it lol

Just a forced redirect to <http://crzymike.info/derp/>

Had to put a self-signed SSL certificate on my VPS so I can get shitcash. :P
