Techniques explained:

- Basic colour correction.
- Skin smoothing.
- Body retouching.
- Lip retouching.
- Eye retouching.
- Makeup retouching.
- Lighting retouching.
- Removing and replacing background.
- * And more!

Each tool used is explained thoroughly, so you understand what's going on all the time. Check out both the preview video and preview images for a sneak-peak at what you'll learn, and a before/after comparison. You also get the very same PSD that is worked on in the tutorial! (Note: accompanying .psd is watermarked and lower resolution)

It's a nice tutorial but I hate when all you can hear is that stupid noise that guy is making after every sentence.

God that noise brings my piss to a boil.
