Thread: [An other subforum for CONFIRMED working eBooks!](#)

Odayleet - August 25, 2011, 4:56 pm

I think that having a sub-forum for confirmed working eBooks would be great.

Why? Just look at my other thread and read other people's opinion.

<https://hackforums.net/showthread.php?tid=1642298>

Something simple but efficient like, all reviewed eBooks with a good score and proven to work should go there so like that people would be able to know which eBook is fake and which is working.

"Yea but dude you just need to look if there's a lot of vouch that's it."

People just go on MSN, ask for people to vouch in exchange of a copy of the guide or some small rewards. So vouch = fucking bullshit.

Skyro - August 25, 2011, 4:59 pm

The section would be dead, as no ebooks on here work.

Just sayin'

Hahah I agree but theres some ebooks out there that do actually work.

Mr. Anderson - August 25, 2011, 5:02 pm

It would be a waste of DB queries. I don't think this is needed.

Odayleet - August 25, 2011, 5:03 pm

About 96% of the eBooks on Hack Forums aren't working.

About 80% of them are posted with a different name.

Chancelor - August 25, 2011, 5:08 pm

No. Because methods of getting certain things or methods of making money will be saturated.

Viral Dragon - August 25, 2011, 5:32 pm

OP:

This won't ever happen. Too much work to set up a subforum for just that. (Or at the very least, when Omni needs to set one up, it takes a while). Moreover practically none of the ebooks work, if you're looking for get rich quick

schemes.

-Viral.

Monstah - August 25, 2011, 5:33 pm

Terrible idea, would be a lot of work to sort the books and people would get butthurt if theirs didn't get in

Odayleet - August 25, 2011, 6:24 pm

It's impossible to get rich fast, people that buys eBook to do so are noobs that completely doesn't understand crap about business.

It's simple, we only need to have a sub forum, have the Reviewers make the reviews and approved the working ones.

(Aug 25, 2011 05:33 PM)M?tt Wrote: [\[CITE\]](#) Terrible idea, would be a lot of work to sort the books and people would get butthurt if theirs didn't get in

A lot of people get butthurt because of not getting Ub3r, getting into groups, staff position, group leader etc.

There will always be people butthurt.

What is your point?

Itachi Uchiha - August 25, 2011, 6:28 pm

Reviewers job aren't to test the ebooks.

Just to review the possibility of it working.

Odayleet - August 25, 2011, 6:59 pm

Anyone can use common sens and think about the possibility of it that could work ?...

Mr. Anderson - August 25, 2011, 7:17 pm

But there are so many ebooks to test lol, Moderators would have a full time job.

Xenochrist - August 25, 2011, 7:37 pm

(Aug 25, 2011 06:28 PM)Itachi Uchiha Wrote: [\[CITE\]](#) Reviewers job aren't to test the ebooks.

And after buying several eBooks here, and disagreeing with the review 95% of the time, I can tell that Reviewers do a horrible job at that.

Validity - August 25, 2011, 7:44 pm

This doesn't really make sense - the reviewers are not given the job of justifying whether or not something "works", their job is to review the elements of the eBook to make sure that it is of quality. Correct me if i'm wrong, but their sole job is JUST not to verify that monetizing methods work effectively.

I think you're on to something here but IMO making a new sub-forum for so-called "verified methods" or something like that just doesn't seem like the most effective way to go about things. I personally think some kind of system being implemented in order to stress reviews is a good idea, but i'm not completely sold on this specific one.

Kosmos - August 25, 2011, 10:46 pm

I agree, 100%; This needs to be implemented. It shouldn't be "too much work", as that is the excuse for pretty much EVERY fucking suggestion I've seen get denied. The Reviewers group, try to help you out, but even then, they're only doing half their job; A Reviewer should be willing to thoroughly review someones product, by all means, I'm not disrespecting their work, but it needs to be done with more care and time. You're not going to go out and rush a review for E-Reputation; No. That's wrong. On the other hand, a Reviewer should actually review someones E-Book or whatever other product it is. Reviewing isn't writing down your small, half-witted opinion about how the thread looks, it's about getting a copy of the E-Book, reading it, THEN posting your review on it, as that is the only way you can review something. You don't just see Books being published randomly, do you? They have to be looked at thoroughly before being published, for mistakes, errors, and other sorts of things, especially if they are for making a profit in life.

tl;dr lrn2review

Kotei - August 25, 2011, 10:47 pm

Just because it doesn't work for some people, doesn't mean it doesn't work at all. It only needs to work for one person to be confirmed as a working method.

For the simple fact that they only take in people who write elegantly in flamboyant English, they never consider people who have field experience in e-books.

My fact that this is true look at [this](#)

Plain fact that any butt hurt reviewer couldn't deny.

Odayleet - August 26, 2011, 12:31 pm

(Aug 25, 2011 07:37 PM)Uprising Wrote: [\[CITE\]](#) And after buying several eBooks here, and disagreeing with the review 95% of the time, I can tell that Reviewers do a horrible job at that. Really true. I'm experiencing the same when I buy from that section.

Developer - August 26, 2011, 12:40 pm

If such section were to be created, then there would be too much corruption since all they have to do is ask their friends to post for them.

Imperial Legion Soldier - August 26, 2011, 12:46 pm

That would involve giving mod powers to certain members, which I'm sure Omni does not want to do. Skill and Boody are working very hard and only have so much they can do.
