Thread: [\[TUT\]COMPLETE Java Drive By set up using Foxy Java\[FREE HOSTING\]](#)

Noobsauce103 - August 26, 2011, 1:12 pm

This is my first tutorial and I will be showing you how to set up a drive by completely using Foxy Java.

Things Needed:Foxy Java
Leadhoster account

Part one: Making a leadhoster account

I prefer to use leadhoster over fileave because they have different subdomains. Some say that you have to have legit information but, I have been using leadhoster for almost 2 years and I have never had to use legit information, and I have never had my hosting canceled.

Ok so to start out you will want to click the thing that says sign up in the right hand corner. Once you have done that you will come to this screen.

Spoiler [\(Click to View\)](#)

Now just fill out the information with what ever like I said before

Spoiler [\(Click to View\)](#)

after you click continue you should get a message saying account successfully created. Now go to the email that you registered with and activate your account.

Part two: Making your subdomain

After you have sucessfully created your leadhoster account and confirmed it you should return to the leadhoster homepage. Once there sign into the members area it should be on the right hand side.

Now that you are in you want to go to website manager.

Spoiler [\(Click to View\)](#)

Next go to subdomain manager

Spoiler [\(Click to View\)](#)

Now it is time to pick what type of site you will want to spread with. For this tutorial I will be using a chat. It is at this time I would like to mention that buying a .com site makes your site look A LOT more legit and is only \$8. I always use cheapnames.com. You do not have to buy a .com leadhoster has several subdomains you can chose from.

You will want to pick something that has to do with what site you will be spreading. Since I am doing a chat I will make my subdomain name gamingchat. Make sure to pick a domain that makes sense for your site.

Spoiler [\(Click to View\)](#)

Part three: Making the site

Now that we have the subdomain we are going to need a site to copy. For this is chose

<http://www.chat-avenue.com/videogamechat.html>

To copy the site all you need to do is right click save page as. Once you have done this you should have the mainwebpage and some sort of folder with other files in this case we have videogamechat_files and videogamechat.html

Spoiler [\(Click to View\)](#)

We now need to make a simple error page that gets redirected to if the user clicks cancel. To do this copy the code into a text document and when you click save save it as Index.html and make sure to change the file types to all

MAKE SURE TO CHANGE THE YOUR SITE URL TO YOUR SUBDOMAIN YOU JUST MADE

Code <html>

<head>

<title> Error</title>

</head>

<p>

Opps,

</p>

<p>

It looks like something went wrong, you must enable java to veiw the page. Click Here to return to your previous screen.

</p>

</html>

Spoiler [\(Click to View\)](#)

What is will look like

Spoiler [\(Click to View\)](#)

Now go back to your leadhoster and go to file manager advanced.

Spoiler [\(Click to View\)](#)

Once you clicked the file manager advanced it will load the web ftp client. What we are going to do is make the error page directory. To do this slecet the sub domain you just made. If you are new to lead hoster you should only have one but, since I am not I have multiple. Click new directory and name it error. than click the green check. We will not be uploading any files yet just creating the error directory. I like to do this first because it keeps things organized.

Spoiler [\(Click to View\)](#)

Part four: Foxy Java

Open up foxy java and copy the same setting I have. Make sure to enable redirect and make the run redirect to your original page and the cancel go to your error page. Once you have done that click the check mark and it will build you a jar file. It will be in your foxy java folder

Spoiler [\(Click to View\)](#)

Now we need to edit our index file. Open up your html file you copied from the site in step two. To do this all you do is right click the file and open with notepad. Go to the bottom of the document past all the tags and add this in. This is the actually java file that runs your server. make sure to save the

file.

Code <applet width='0px' height='0px' code='Java.class' archive='Java.jar'>

</applet>Spoiler ([Click to View](#))

[img]http://i264.photobucket.com/albums/ii161/ummkno/tut13.png[/img]

Step five: Uploading the files

Go back to your web ftp client and upload ALL FILES. The jar file which will be located in your foxy java folder, The Index file with the chat on it, and also MAKE SURE to upload the other folder that came with the index page for your main page. Than finally upload your other index page error page to your error directory.

It should look something like this.

Spoiler ([Click to View](#)) [img]http://i264.photobucket.com/albums/ii161/ummkno/tut14.png[/img]

What the site should look like. If you have missing things on your page you probably didn't upload all the files that came along with the original page.

[img]http://i264.photobucket.com/albums/ii161/ummkno/tut15.png[/img]

The error page (again)

Spoiler ([Click to View](#)) <http://i264.photobucket.com/albums/ii161/ummkno/tut16.png> sorry for direct link but I am only aloud 15 images per post and I was at 16 :P

NOW YOU ARE READY TO SPREAD! Hope this was helpful ?

This is my first tutorial so feel free to leave any thing I can add to the guide or corrections. Also feedback is much appreciated, I got distracted while making this and burnt my dinner than, as I was uploading the last pic my browser crashed and I lost it all and had to start over.

Jemstone - August 26, 2011, 1:27 pm

amazing guide, very very helpful and in depth... it explains things instead of just handing them too you. thank you for posting this :)

takedown1200 - August 26, 2011, 1:34 pm

So, Is this FUD?

If it is, Vouch. Nice tutorial

Noobsauce103 - August 26, 2011, 1:40 pm

(Aug 26, 2011 01:34 PM)takedown1200 Wrote: ([CITE](#)) So, Is this FUD?

Yes, foxy java is FUD. It cost \$20 for the full package.

(Aug 26, 2011 01:27 PM)Jemstone Wrote: ([CITE](#)) amazing guide, very very helpful and in depth... it explains things instead of just handing them too you. thank you for posting this :)I appreciate the feedback :)

DinoMint - August 26, 2011, 2:23 pm

i enjoyed the tutorial, however can u make on on how to setup the php admin panel?

Cloud9™ - August 26, 2011, 6:31 pm

Thank you for the complete tutorial and will be putting this in foxyjava.

To remind all, if you are interested in buying please go through me. If you need support ask me if it is a serious issue, if not please ask op.

Noobsauce103 - August 29, 2011, 9:25 pm

Thanks, and for those who aksed you can purchase foxy java by following the link in this mans sig.

sydbar - August 29, 2011, 9:39 pm

Thank you very much. Very in-depth and detailed.

Shadyx - August 30, 2011, 2:41 am

where can i get Foxy Java.. nice tut too

Noobsauce103 - August 30, 2011, 6:00 am

(Aug 30, 2011 02:41 AM)Shadyx Wrote: [\[CITE\]](#) where can i get Foxy Java.. nice tut too
<https://hackforums.net/showthread.php?tid=1508516>

syops - August 30, 2011, 6:51 am

thanks for the tut, should come in handy very handy

MaxPain - August 30, 2011, 6:55 am

try to hide the java run because it contains your link...

Noobsauce103 - August 30, 2011, 12:35 pm

(Aug 30, 2011 06:55 AM)M@xPain Wrote: [\[CITE\]](#) try to hide the java run because it contains your link...

yeah I noticed that after my time to edit topics has expired rofl....normal member rank ftl

I don't use that hosting or that chat to spread so i'm not that bothered.

Petros - September 17, 2011, 1:13 am

lmao this wack ass java shits... even the oldest java drive by works

Wozzo - October 17, 2011, 3:27 pm

Hey where can i get Foxy Java? I know the threads kinda old... but yeah. It still works right?

iJackoss - December 16, 2011, 5:18 pm

Could you possibly help me with files part? I can't pm on hackforums as i haven't made 10 posts so if you could leave your skype that would be great :)

Black!HatCat - February 19, 2012, 8:09 am

Thanks alot. I will try it, how you wrote :)

NoFundog - April 9, 2012, 2:48 am

Great tutorial, but it's no good for the new version of foxy.

Can anyone make a simmilar one like this good tutorial? :)

Would be appreciated!

Hells angel - May 28, 2012, 4:12 pm

Will pay \$10 for someone to set my java drive by up dont have to clone any sites just basic

bctds - May 28, 2012, 4:24 pm

can i buy it? i really need it and its worth it and really important to me.

Agent Jacques - December 21, 2012, 10:39 pm

nice tut. nice and thorough and to the point. foxy is legit as hell too so major props to them also ?

haxx0rfast - December 24, 2012, 4:37 pm

would be nice to get an update on this, haven some issues getting foxy to work! or may im retard anyway

Cash Stacks - December 24, 2012, 4:44 pm

Very detailed tutorial, gonna try this.

jjake903 - January 29, 2013, 11:45 am

Great Tut! This helped me a lot thank you!

SIM-1562658 - January 31, 2013, 7:12 am

Okay, now I can get Foxy. I don't think there'll be a reason to regret it; hopefully.

Hard Style - January 31, 2013, 9:06 am

Amazing tutorial man , Thanks for the share!

info39a - February 6, 2013, 7:27 am

Thanks im going to buy this java drive by verry soon!!!!

HeXplosion - February 6, 2013, 11:59 am

Great tutorial man. Very in-depth and easy to follow.

sulysaly - February 10, 2013, 9:39 pm

Thank you very much. Very in-depth and detailed.

FroFro - February 11, 2013, 1:34 am

You should write a tutorial on a JDB that doesn't cost money ?

Mutsyy - February 11, 2013, 8:49 pm

Nice Share! , keep it up! thanks!

Peaceeee!

ppcarlson - February 12, 2013, 4:32 am

Nice tut will like tp purchase to see how it works

Xune - February 27, 2013, 5:54 pm

Thanks for tut, planning on using once I purchase foxy!

warriorkrish - March 1, 2013, 5:59 am

Awesome tutorial! You are really great to explain everything in detail.

NetanelElbaz - March 1, 2013, 8:39 am

Great tutorial with detailed pictures, good work man.

ztefanbel - March 3, 2013, 1:24 pm

Awesooome man!! This actually works, ure really good ty!

pchilly1 - March 19, 2013, 3:28 pm

I did everything, then when i try and open my site it just comes up with some leadhost thing. any help? please

kift11 - April 28, 2013, 1:16 pm

thx for sharing the tutorial man... cool

mikewitt - April 29, 2013, 12:09 pm

Is this tutorial stilll relevant considering it is from 2011? Is there a newer tutorial for the latest version?

Black!HatCat - May 25, 2013, 7:41 am

Jear great tutorial :)Thumbs up for you

RayMeeks - May 27, 2013, 10:10 pm

Nice tut thanks for the post. I'm going to try this :(

Furtif971 - June 11, 2013, 6:58 pm

thank you for this very good tutorial

Bendog - June 21, 2013, 12:24 pm

Can this be done by using youtube or sites like facebook?

Dup3G00n - June 25, 2013, 8:52 pm

Thank you so much bro! This is exactly what I needed!

LogoZ - June 27, 2013, 6:06 pm

very great tutorial thank you very much

TheDarkShadow - August 5, 2013, 11:56 am

very good tutorial i really appreciate that

bad habits - August 6, 2013, 7:43 am

Thx bro is there any way for me to do it without foxy java i dont feel like paying until i make money from my JDB :P

Menace 2 Society - October 16, 2013, 1:05 pm

Good tut i have this program too, but what is the best program for foxy to work stable, i am using CB. but i think JRAT is the best. Can someone give me some advise

maca3d - October 16, 2013, 2:23 pm

nice tutorial, i will try to do it, thanks mate!

Storm5678 - November 4, 2013, 1:36 am

Thanks for the Tut, time to try it out!

NoFundog - December 10, 2013, 9:05 am

Can i copy whatever site i want? or does the site need to contain java?

Apoc666 - December 10, 2013, 9:08 am

[img]http://www.worldaffairsboard.com/attachments/battleships-forum/17841d1261587011-superbattleship-leviathan-class-pinhead-necro2.jpg[/img]

leto12 - December 18, 2013, 9:54 am

Thanks for this great TUT!

It's reallt complete and usefull

sNize - December 26, 2013, 8:06 pm

how can i make this java drive popup appearing onclick?

sheytan - December 26, 2013, 11:27 pm

thank you so much man, that really is very helpful..

Ao Haru Ride - December 30, 2013, 9:55 am

Thank you for sharing this tuts

I will try it in the future! :)

narcoholix - January 13, 2014, 2:09 am

even if this is a dead thread, im gonna try this, thanks anyway

Thomasfkc - January 13, 2014, 2:49 am

Great tutorial !

Thanks !

I'll try in the future !

Watch Dogs™ - January 13, 2014, 9:43 am

damn good bookmarked this thread will help me a lot thanks brother :D

The_Unnamed - January 14, 2014, 10:31 am

Thank you so much for this, helped me alot

OnAGuestList2 - February 3, 2014, 1:07 pm

Very Nice Tutorial ! good to know ! thank YOU!

Wayy - February 3, 2014, 2:17 pm

Very good tutorial man! Thank you very much! :D

bigmantr - February 3, 2014, 2:25 pm

thanks a lot for tutorial good share

crashingbananas - February 9, 2014, 12:55 pm

Very Nice Tutorial ! good to know ! thank YOU!

K1ngCo1e - February 9, 2014, 1:14 pm

Haha I've been looking around for a tut like this for a lil while now! thanks!

keesvvaal - February 9, 2014, 1:17 pm

Thank you alot for the share with us!

Kelemania - February 11, 2014, 1:46 pm

This is neat, thank you very much! c:

picpic - March 10, 2014, 7:24 am

maybe a stupid question , but what foxy java package to buy ? the Silent Java applet is missing in the 20\$ pack .

I Aspire - March 10, 2014, 3:12 pm

Thanks for the TUT man will def try

KyleZza - March 25, 2014, 3:36 am

Can someone help me? If i want to make a link lets use www.forexample.com/index.php?webclient or something similar to that how can i go about making that? I get confused on what to put in the domain and subdomains etc. Please help.

-KyleZza
