Hello Hackers.

Did you know that EuroCron Spy is the simplest way to hack password? Using EuroCron Spy you can secretly record all Email, Chat, yahoo & msn messenger passwords. If you think this software is something you would be interested in, you can get it here.

Can someone explain this please :/

This is just putting a keylogger on your own PC, then the victim has to use your computer and you can playback what the person did. Not really "the best way" if you ask me TBH.
