Thread: [First program in VB. Whatcha think?](#)

Danks - August 27, 2011, 11:26 am

I made this to spread to 10 year olds. What you guys think?
Its not a working ddoser.

Just looks ugly but i love that beautiful nug in the back look like this nyc Diesel i had

make the form fit the application more :D

SoulZeh - August 27, 2011, 11:29 am

this is a simple pinger and no offence for first try it not that good tbh
this won't drop anything

so what is the point in posting this if it don't work or don't do nothing It just for looks well sorry it shit

VictiM™ - August 27, 2011, 11:32 am

whats the point of making a program if it has no working functions?

Danks - August 27, 2011, 11:37 am

Ill explain it to you in steps.

- 1.Find a 10 year old
- 2.Ask him if he wants to have a free ddoser
- 3.You give him the fake ddoser with a rat attached, instead of him trying to open a regular .exe file that never opens.

Just for spreading his RAT/Keylogger/Stealer...that's what he says.

AndiMischka - August 27, 2011, 11:40 am

Looking good.

It may work on a 10 year old.

Svarteman - August 27, 2011, 11:40 am

I thought fakes were not allowed here?

I thought fake apps ain't allowed on HF? ??

Svarteman - August 27, 2011, 11:41 am

In any case I think that if you will continue making those stuffs then you should get the fuck out of here.

Immortal - August 27, 2011, 11:42 am

This is a fake but doesnt have anything attached yet you have to attach our own shit xD

P?radox - August 27, 2011, 11:42 am

Looks good, fake programs aren't allowed on HF though.

Obviously? I2read. I hate faggots like you.

Modesty - August 27, 2011, 1:58 pm

Haha when I see things like these posted, I understand why people are starting to hate the majority of the younger generation.

Who said it was cool ?

I said i wanted it :)

Dose not mean you have to have any.. lol..

DJ BrU - August 27, 2011, 2:26 pm

This looks like it was coded by a 10 year old.

Does
Msgbox("Ddos Complete!") count as code lol...
Btw OP did you put any code for the progressbar to load when they click attack? if not then you really suck

Such an unbelievable messagebox.

Code MsgBox("Unable to find specified target!", MsgBoxStyle.Critical, "Error!")
Much better.

ooo, using this i might be able to up my tricking age to 12.

Spolen - August 27, 2011, 7:11 pm

For all the people talking about it being a fake program, from what I saw its just a picture of a fake program, not the program its self, and if this will have a rat attached to it and the rat works, then its a

functional rat. Nonetheless I still think its dumb, why do you want to spread to 10 year olds, seems kind of pedo to me (not flaming just saying).

MasterShake - August 27, 2011, 7:35 pm

Make it do something add a tabcontrol and put a spammer or something in it for a first go it dont look bad. I would suggest adding more buttons and make the progress bar do something after the button click.

10 year olds like using their parents credit card to purchase virtual items,

I take the items

Profit?

badlyfar - August 27, 2011, 7:53 pm

Nice one. 10 year olds have no idea what they are doing, and therefore you will get some easy slaves. Good luck.

Volgare - August 27, 2011, 9:16 pm

First of all put "Victims IP" looks more legit, but a part from that great work.

I guess I see what your saying, it does make sense I just have a habit of thinking the worst in people. If you have a good plan don't let people tell you not to follow through with it, because the world is full of haters.

Yeah, but then they will have the argument

"awh man i dun diddly dunno how to find dat durr i pee adresser"

This is mostly going to be spread for online games.
