Thread: [Question about multi Freezing.](#)

P??sonl?af - August 27, 2011, 3:28 pm

Hiya,

First of all sorry to ask something as I like to keep it independent but I don't know.

I used the search button for a answer to my question that if it's possible to freeze two or more msn accounts at a time?

Is there a way to multi open my program I used, or is there an other program for it?

I use mass-mania V5 btw. Great tool.

Thanks in advance.

I'm not really sure what it is your asking, what do you mean freeze msn accounts? It could be just me I just don't quite understand the question.

P??sonl?af - August 27, 2011, 3:36 pm

That they can't log into msn anymore.

This tool

<https://hackforums.net/showthread.php?tid=1498027>

Function Mess-freezer.

The function is good for freezing one account but the question is is there a way to freeze multiple accounts and if yes; How.

randykentucky - August 27, 2011, 3:38 pm

Ok, thanks for clearing that up, it was probably just me. I'm not familiar with that program so can't really help sorry. I am sure somebody else will be able to.

ImNormal - August 27, 2011, 3:38 pm

Maybe try downloading multi MSN freezers then use them all at the same time?

P??sonl?af - August 27, 2011, 3:40 pm

At the moment Mass mania is the only one I've found that was working for me.

@Randy No problem, thanks for trying to help anyway.
