How to get free apps(installous)

How to get free apps

Sorry this is only for jailbroken idevices

Ok so first you are going to want to go to Cydia and add this source:

Source: [cydia.hackulo.us](#)

After you have the source go to the search option in cydia and search installous 4, download it after it is downloaded go to your home screen

And you will now see a icon named installous click it then you can either search for a app you want or you can see what the most downloaded apps are.

Once you have decided your app click it then click download it will then pop a box saying the names of people who uploaded te game an where it is uploaded choose one wait the time if te website has that ten click download and your app will start downloading.After it's downloaded click it then click install let it install(so don't do anything well it's installing)once it says done you can leave the app find it in one of you pages and play it:)

This is for beginners so don't be like we all know this because there are a lot of people that don't

Its a nice tutorial but its LQ. If you search this forums, there is already 100 tuts about this. Im not trying to be a dick; but if your gonna make a tutorial make it something that no one else had made it .

Gummo - August 27, 2011, 8:50 pm

This is like the most basic thing you can get from Cydia, why don't you make a thread about something deeper that is hidden in Cydia.

Ok I will show some less known stuff in another tutorial

Døn - August 27, 2011, 10:14 pm

You don't need to be sorry, at least your trying. Just make it about stuff people don't know about.

Alside - August 27, 2011, 10:27 pm

it's betterote='DonBoy1230' pid='15139100' dateline='1314508478']

[/quote]

I did say that this was for beginners also there are lots of this but people still ask how to do it also look at this if mine its better <https://hackforums.net/showthread.php?tid=1656091>

iKQLY - August 27, 2011, 10:51 pm

Guess its good for newbies... I've seen this every where though :/

Tacnayn - August 28, 2011, 1:44 pm

Lol, this is a trash tut!

One: I'm pretty sure a new JBer would use Google before they search for a hacking forums that has an iDevice section

Two: this is extremely LQ, terrible Grammar, and it's just terrible!

KK i do know alot of stuff other people dont know so i geuss i will so you liked my other tut?
chronictv is a vary not known site that is amazing

Chubs1337pwnZ - August 29, 2011, 5:27 pm

@Glandu, no I was not talking to you. I was talking to the try hard that posted b4 me.
