pm me and details will follow! ;) So thats 4 spots left

nmcat1 - August 28, 2011, 12:08 am

Add stability. Just basic features. If you want something with features use a rat.

indicud - August 28, 2011, 12:13 am

I'm very interested, I can also spread very fast if that helps.

Conlaoch - August 28, 2011, 12:16 am

3 spots left!!

botted im saying no cus your rep sorry mate

Kiyongo - August 28, 2011, 12:44 am

I'm very interested can I please test it?

Thanks for advance :D

Cybergasm - August 28, 2011, 1:06 am

It works very nice i executed the server on a number of my bots and received them all also very nice GUI. I would defiantly by a copy of this DDoSeR.

Here is a screen shot for you

What are you Talking about me and c4n coded this... Flame else ware....

BlackHops - August 28, 2011, 10:12 pm

If it's a herding client with ddos then you should just focus on stability and anti-botkiller features

Yes, I decided that yesterday.

ORRR I COULD COPY PASTA MORE ?

for the lulz

lol thank you... Dont know why i feel that as a compliment!

Coding4Noobs - August 29, 2011, 11:55 am

okay guys when i coded this, i was testing a new method of persistance but it made it unstable, clearly found that out during beta's so i rewrote the client without the new mothod of persistance so it uses less cpu and reconnects better.

please wait till tommorrow to recieve it, and to all who dont kno what SYYN flood is, it creates a half open TCP Socket and continues to open then close
