(May 21, 2011 09:15 PM)BioHaza?d™ Wrote: [\[CITE\]](#) Carecare had given me a trial and asked me to review his site. Note: This is not an 'Official Review' as Reviewers only provide official reviews to eBooks. This is merely a normal, user review.

I've been looking for a site like this for a while now. The one I used to use went down. From first impressions, carecare's wSpy looked clean, professional, and easy to use. The three different options for capturing IP addresses will make it much easier to trick someone to click a link and have no idea their IP was even logged. With just a bit of social engineering, you should be able to get anyone's IP. All the features appear to work quite well. Just about anyone will be able to use wSpy.

Pros: Very professional, free, works well, quite a few features, easy to navigate and use.

Cons: None that I can see.

Good luck. wSpy has a lot of potential and it looks like you spent quite a bit of time on it.

I have just used this and here is what I can say, it works amazing. The features on it are great. For the price that it is selling for it is totally worth it! The thing that I loved the most was the different methods of links, between redirect, image, and 404 error this is amazing. When I first looked at this product I was like ah cool another IP grabber. I can now honestly say that this is unlike any other. Many great features and an amazing interface. I vouch for this product.

It is indeed a good thread design :)

worzel - October 1, 2011, 3:25 am

I was so impressed with the professional look of the thread that I jumped straight in and bought the wSpy Pro. The interface of the website app is just as impressive. I did encounter an issue with logging in which I think was a problem with the pwd length, but a few pm's later and it's all resolved - carecare is very easy to deal with.

wSpy is a doddle to use; even I managed to capture a an IP from a designated target :) The pro version has the extra features which are definitely worth the 15usd it cost me. I noticed today that wMail functionality has been added and it looks impressive; a simple self-test showed that the target only has to preview the email for it to trigger the capture of their IP. Clever wording of the subject line (to make it more likely they will open/preview it) will bring greater success.

So far I have had success with the image and url redirect options and both are simple to use. I can see a lot of IP's coming from both.

A question for carecare:

It say's on the thread description of wSpy that this is all 100% anonymous and undetectable; does this mean that any port scanning and emailing can be completely anonymously - even without using vpn and/or proxy?

?

Why would you like to grab a cs server ip address? It's already available? Oo

If you mean grabbing the ip of the players in the actual game? No, you have to use tools like Comview for that.

Thanks for the critique!

Yeah, the portscanning can't be traced back to the user, basically it's using simple connection() attempts at popular ports and this action is done server side.

As for the email (wMail) the users IP are not sent in the header at all, it's done server side aswell :)

Question, from what I know AES-256 is not decryptable, so, if the logs are AES-256 encrypted, then how would they be showed to the user, if they need to be decrypted?

Thanks.

Thanks.

PHP calls it rijndael-256 and it's very much possible :) The passwords are also using uniques keys (SALT if you want) so even if the database would get compromised all the data would be unreadable, also the crypted passwords are never shown/represented to the user, they are stored in the database in varbinary format.

For example, a typical log is represented as follow in the database:

Spoiler [\(Click to View\)](#)

Your point is? People code new stealers / trojans / http bots every day, still there's 1021+ free ones available in the market - you get what you pay for.

If you read about the benefits of using wSpy you will understand why it's superior to any other ip grabbing service, it's not limited to just generating link redirects either, you can even get someones IP just by sending him a mail (wMail) , and the Image option works on anyone, even those who wont open suspicious links since the images can be embedded on trusted sites.

A IP lookup is ofcourse nothing new, I just want to make wSpy an all in one web tool and code the stuff myself, this would just be a extra feature for the PRO users. And wSpy using a simple URL Redirect is free, wSpy PRO is just an alternative providing more features and options, it's a service simple as that.

Hey! It's very noob friendly, everyone can use it, if you need any help just to pm. :)

It's not like Cain & Abel (not for networks or programs), it's for grabbing ips over the web.

clickhead - October 11, 2011, 4:51 am

Oh, cool. What will be different about the ip lookup scripts this time?

carecare - October 11, 2011, 5:10 am

Oh, it will be a separate tool from the actual IP Logger - it will just be some simple but useful tools gathered in one place such as ping, full range portscanner (maybe), dns lookup, custom whois etc, but it's just an suggestion so far :P

clickhead - October 11, 2011, 5:12 am

Hehe yeah, although I figured since the image option is ment to be used mostly for embedding images they don't need that many alternatives. Since they are images the co.cc domains still appears legit.

I might add more later :)

I'm currently replying 80+ pms - try and PM me in like 10-20min or so ^^

@Anonymous - January 22, 2012, 10:20 pm

Just want to ask one Question.. What if the Person is on VPN?
Will it Grab his original IP or VPN IP?

Thanks!

This is amazing I got a Pro account, and here is a great method go on omgele and say your a girl look at me thats a great method :)

The Pizza Slut - March 13, 2012, 10:31 pm

Big vouch for carecare, this is an awesome product! Well worth the \$8.

Nulli Secundus - March 13, 2012, 10:48 pm

Is this still being sold? It looks really cool.

Fox - March 13, 2012, 10:50 pm

Huge vouch for carecare! I purchased wSpy PRO way back in September and I'm still using this great product.

Mordalum - March 13, 2012, 10:52 pm

Nulli Secundus, this is still being sold.

Regards,

It's products like these that keep my hopes up for HF. Carecare knows what he's doing, the thread and the product look super smooth. Gives good support and is nice to his customers. And it's not crap that he's selling. Even though he has ton of customers the payment went quick.

then the product:

Been using wspy since it's beta release, never had any problems service was up and running and it didn't matter that I still had a free account. It all kept on working. This method is the best there is on IP grabbing. I get 9/10 people with this. I would suggest this to any hacker, forensic or computer fanatic to buy.

I didn't buy this because I needed the pro version that bad, but more to support his product which I like so much.

watevabroo - April 27, 2012, 5:46 pm

I've contacted you 3 times for a way to buy this.. please get back to me..

If you don't want to sell it to me or something, please let me know, so that I don't waste my time. Thanks!

kristo199 - June 10, 2012, 10:13 am

That's one of the best grabbers ever, used it at the begginig of that site adn it worked well, now it's even better , but i have't money to pay for it so i can't upgrade.But vouch for it.

Gee4rce - June 11, 2012, 2:36 am

Well this comes late, but still though better then never:

I bought wSpy longer time ago and i can totally vouch for it and carecare as seller - he really took care of my purchase very quick and im totally satisfied with the Product! <3

It keeps what it promises,- nice features, all work fine and it has a very, very clean GUI!

One of my best buys here on HF :) !!

Mister Spiderman - August 1, 2012, 5:08 am

Is this still being sold? This is exactly what i was looking for, but I see there hasnt been a post in a long time

same i messaged him but no reply :S its been like 5 days since i msged him. i really hope he will sell me premium access to his website its awesome

Flaxpicker - August 1, 2012, 7:13 am

Yes its still active, i use it

Theres an auto buy on their site u can buy it from there

last i checked they disabled the auto buy.

edit:The autobuy payment system has been disabled, please PM CareCare on HF on instructions on how to purchase!

Mister Spiderman - August 1, 2012, 2:32 pm

yea i seen they disabled auto buy as well, sucks because i have checked online and do not see really anything else like it. I also checked his latest activity on here and he hasnt been on this site for a few weeks.

Rod Serling - August 27, 2012, 4:40 pm

i really want to buy this dude.

I sent you a PM about.

already registered

wanna buy Pro though :D

Send me the payment options in PM please

I use paypal

Good luck with sales!

i just asked the same thing

the thread and icons are very nicely designed

Arkad - November 11, 2012, 8:49 pm

Brought this when it came out, still going strong, thanks heaps... big vouch !

Sky - November 11, 2012, 9:19 pm

I will definately buy this if I can be shown proof the cookie stealer work's, I have not yet seen a working one, Only one's that log the IP...

carecare - April 11, 2013, 12:25 pm

Hey, I will continue working on wSpy now - please PM any new features you would like to see

carecare - May 6, 2013, 3:04 am

Hey guys, if you like this service now is the time to get wSpy PRO and recommend it to your friends so that I can extend the hosting for another year - i'm not asking for donations but wSpy might go offline if I don't get enough hosting money

Apteryx - September 17, 2013, 7:28 am

This product is dead I assume. If not I've pmed you and I am interested in buying it.

dahrat - September 27, 2014, 4:40 am

it is not dead, i am using it still. greatest tools ive had in a collective category for sure.

Idk it appears to be dead to me

the links generated go to some ugly ass fucking thing that shows the domains have not been renewed yet

The Rage - September 28, 2014, 4:16 am

i think this is Dead :O Let me know if its still A live :)

dahrat - September 28, 2014, 6:45 am

i will gladly donate when i can for sure. i suggest anyone to get this service and help it live, its so bad ass to have in the arsenal, ive gotten thousands of people using wspy from facebook,twitter,irc,emails, you name it. and the gui is so friendly

DownUnderRAT - June 25, 2018, 10:45 pm

Hey Carecare, Can you please PM me, I would like to purchase this but can't PM as i am only new

WtfBits - June 25, 2018, 10:55 pm

Sponsored by iCrypt? werent they banned for backdooring their apps? this was all made public on hackhound etc.
