VirScan clearly says

"If the file you uploaded is detected as suspicious, VirSCAN will send the file and report off to the antivirus vendors participating in the VirSCAN service to be analysed. Antivirus companies will update the signature virus database if a real malware is found. If you disagree with VirSCAN's clause or agreement, please don't use VirSCAN's service. VirSCAN will not save the file you uploaded once, so please don't contact VirSCAN when you can't find your file. VirSCAN.org is organized by several fans of antivirus industry and it is a free website and it is not an opensource project,either. VirSCAN's service is free and public. VirSCAN is neutral to the antivirus vendors. VirSCAN is kindly supported by many antivirus fans and antivurus vendors. "
