(May 30, 2011 06:55 AM)PR? Wrote: [\[CITE\]](#) I was a beta tester of this amazing product.

The anti bot killer was amazing, I tested it, I killed my rat, and a little while later it came back.

The output size is also good, and that it is a fast download for if you want to buy installs.

IT is FUD 0/33, which means that you won't be losing victims.

The GUI is amazing too, it looks nice, and the options are quite nice.

I can't wait for the spreaders to come, but at the moment it is an awesome downloader / protector for your malware.

VOUCH +++

(May 30, 2011 07:36 AM)Blue Screen of Death Wrote: [\[CITE\]](#) I must say that I was a tester of this amazing product.

London Worm is the best choice for everyone who wants to reach the best experience in this domain.

I tested the full features of London Worm on my PC with Windows 7 32bit. I need to say that it worked perfectly, i never expected at the results i had. I have installed Kaspersky Internet Security, MalwareBytes Anti-Malware and the UAC was turned on. None of them reported any problem with the worm while it has been running.(Kaspersky and MalwareBytes Anti-Malware are the latest version and database is up-to-date)

The quality-price ratio is unbeatable. This is one of the cheapest, most effective and the longest FUD worms from HF.

The AntiBot Killer is also a very good feature of this feature. Like the seller said, if your rat/keylogger server is killed, the worm won't be killed and your rat/keylogger server will be re-executed.

Updates are frequently released and the product will be FUD always.

As a final note i must say London Worm is the best choice.

(May 30, 2011 08:56 AM)-Exiled- Wrote: [\[CITE\]](#) I was a beta tester and this product is amazing it is the best Ive ever seen I mean forget the great GUI that is user friendly and offers instructions if you don't know how to use some of the features. This product offers great features, and the bot kill is a piece of art it killed my RAT and the best part is its 0/33 so you don't have to worry about losing tons of victims per day. And I tested it on myself and all the features work 100% and the bot went through all of my antiviruses like a ninja and the custom anti virus adder is a great idea too, it seems like this program is full of great ideas and great intentions to the buyer. This program is well coded and has updates frequently so that it stays FUD and the coder Megan Foxxx really knows what he is doing with this and so far its the best Ive seen on hackforums. Thanks Megan for letting me use and keep this wonderful program this is well recommended and its just a all around amazing program.

Like d3xtaz say,I'm also interesting in buying,since I heard only good thing abiut this product,so when you fix all errors please let me know,and I'll buy it.
Thanks.

Delta™ - September 15, 2011, 4:18 pm

im buying this tomorrow i cant wait
whoohoo hoo

Glitched - September 15, 2011, 5:52 pm

Is it me, or is fake bsod on both columns of the worm features list?

BTW, if you decide to edit the GFX, the "stub updator" is spelled wrong.

Megan Foxxx - September 16, 2011, 1:13 am

There is a small update big going around ATM
Let me just work this out and it will all be working!

Og yeah I'll update that ASAP

That's fixed in 1.1 I will update that

Ive worked out the update bug and am fixing it now

After much struggling and screaming i fixed it all

However the update system isnt working on 1.1 or 1.0

Therefore i did an emergency update to 1.2

To get 1.2 you need to delete your current AIO and the link i gave go to the link i gave you to
download it (Also in AIO order email (NOT PLIMUS EMAIL))

The password is still the same, and this should be working super fast

Builder fixes:

Improved start up time (Cut 75%)

Reduced all errors

No crashing

General fixes

Any problems, PM me or hop on live support!

DO NOT LOAD UP THE OLD VERSION!

IT WILL AUTO BAN YOU!

This is important!

d3xtaz - September 16, 2011, 11:37 am

Bought it today and so far im truly liking the Product, works perfectly fine :)

a big vouch and Thanks Megan for the help n looking forward to use it for long....

vmartin - September 16, 2011, 11:47 am

Persistence with the keylogger still doesn't work/corrupts the server.

Megan Foxxx - September 16, 2011, 11:48 am

I've got an update in the works

Probably release it tomorrow

I vouch for this great product everyone should get it,
i'm loving the aio and all its features.
great job Megan ?

SpK - September 18, 2011, 3:07 am

What is YouTube spread if I may ask?

Megan Foxxx - September 18, 2011, 3:12 am

Sure, Questions are welcome

It attempts to comment on the top 10 most watched videos, of that day.

Scaliber - September 18, 2011, 8:20 am

It's simply the best, common with all these feature's and such for such a price it's just magnificent !!!

best product i've used till far !!

i love it ! ;)

Heisenberg Walter White - September 18, 2011, 9:39 am

Guys , listen to me...

I got the AIO, build a worm and run it on my bots...

2 fucking minutes later i got 20 new connections .. just by running the worm

Every minute new connections are coming in..

I highly vouch for this programm , it does its job....

Buy it !

Dozix - September 18, 2011, 9:47 am

Looks great. Tho i have to ask if dropbox spread is such a good idea, considering they scan on VT?

I have been thinking that

I may remove it in London Worm Stub update 1.1

Thank you for all the vouchs everyone

Still selling!

I just ran 50 bots on the worm, so hope it works good will post back.

Delta™ - September 18, 2011, 2:01 pm

Omg this is perfect HE has My Vouch i bought everything on this london aio , crypter and the worm it is so perfect i cant describe the perfection in this. Its all stable and perfect all 100% he has my vouch again GLWS

Impurity - September 19, 2011, 3:50 am

Vouch for Megan Foxxx! Great product and great coder! All FYIDirect customers get a 15% discount on London AIO.

Royal Flush - September 19, 2011, 4:08 am

Well, all kind of vouches,

But the worm is still 7/35. And it also was 7/35 six days ago ehh?

Yes its still 7/35 (Beta stub 1.1)

There is also a new tool in 1.3 that will allow you to use any crypter and add the data to the crypted file :D

The current stub one is 11/35

Royal Flush - September 19, 2011, 4:23 am

Shouldnt your worm be FUD from itself? :S

And what crypters are compatible with the worm? (ON HF)

Megan Foxxx - September 19, 2011, 4:24 am

Its much to much work to keep it FUD with my customer base. Therefore im going to update it, however not keep it fud.

Any crypters will now. Ive added a new tool which allows you to
Ill explain it more when the update is out though
