Well, there's just two of them right now. But I do plan on writing some more, I'll probably edit it in this thread if I do. ;) Enjoy. Everything used in the tutorial will be provided in the download, just scan to the bottom of the page. Oh, yes. Click the image and it should redirect you to the page.

Cool, i can make myself better at photoshop with these tutorials!! thanks..
btw do you know whats the Font of the title?

Sin™ - August 31, 2011, 9:59 am

Of course! I made it myself after all. The font name is; Budmo Jiggler-- I think it can be found in dafont.com.
And you're welcome. ;)

Sorry about that guys, but if anyone else is interested in looking at these tutorials it's located in my dA.

I recently took down my graphic blog but I'll probably be opening it again soon. For the mean time, you can find all of those tutorials on that link above. :)
