Pic selling doesn't work.

Only complete retards fall for it.

If they wanted pics they could just go on some Pron site.

Cool.

I don't want to sound ungrateful or anything, I am just trying to learn.

But the question is, what can we do with a pack of like 100 pics of a girl, if none of them are nude pictures or anything of that sort? Any special thing we can do with them?

Sorry if this is a noob question ?

Neal Caffrey - September 2, 2011, 4:12 am

Of course you can.
Make a Fake FaceBook, Link it to your eWhoring Email and then if they look you up, it seems legit c:
Make sure you add lots of friends though, those can be random people c:
Its a common Question c:

Yeah, but that's the obvious part, I am more thinking about how to monetize with that. What sort of follow up should come after I connect with some guy using my facebook account or something else?

Neal Caffrey - September 2, 2011, 6:02 am

You should never add him. He could virus you or some shit.

Just for show? But what's the point of showing it if I can't ewhore? LOL

I am sure something can be done, I am just curious to what direction I should look into... but maybe not even you know what to do with it, or you don't want to share ?

First if all, thank you EpiclyFailHacker.

When you send him a PM, please pick one of the packages, right now it's only one package each user.

But that's okay because I'm quite happy with the package i got (package #2). It contained 80 something pictures, that was sorted out in three different folder(Mobile uploads, Profile Pics and Other). The Mobile Uploads folder consist of picture taken with the girls cellphone. Some are normal, some are quite slutty, but no nudity. In the Mobile Uploads file you'll also find pictures of the girl with friends.

The Profile Pics folder consists of pictures that's the girl most likely used as profile pictures on some kind of internet community, like Facebook or Myspace. You'll find some of the pictures from Mobile Uploads in the Profile Pics folder, but it mainly consist of new photos. You'll find pictures of only her and pictures of her with friends and whats most likely a boyfriend. A few pictures is a little slutty, but most of them are normal.

The last folder (Other) consists of pictures of the girl with friends, mostly at parties. You'll also find a few two screen shoots from something that looks like Facebook games or applications.

It's looks like all the pictures is taken from the girls Facebook, and organized in the same folders as it was organized on her Facebook. The package is ideal for creating a fake Facebook or Myspace, but it's not as ideal for selling pictures because it does not contain any nudes.

All in all, a good package if you want to create a fake Facebook or Myspace.
Defiantly worth downloading (only 10 mb!), especially because it's free !

Defiantly worth downloading (only 10 mb!), especially because it's free !Thanks for the feedback :D
The other one has 220 Photos :D
I'll be sure to PM you that one too for reviewing into such depth :D
Anyone else want these Packs?

habla - September 4, 2011, 7:17 am

I received package #1, again thank you EpiclyFailHacker.

EpiclyFailHacker is only one of the two package, to be honest , i would recommend package #2 (previous page).

First of all, there i no nudes or slutty picture in the package, just so that i clear. It mostly contains picture of the girl with friends, a few of the girl only(taken with webcam and digital camera). A few pictures that's not of anyone, something that's like, "Music saves my soul" and such.

Also some pictures from a play the girl participated in.

The girl isn't hot, she isn't slutty and she's not attractive in anyway, there's one picture were she look a little hot, and that picture is the picture that's posted as a preview. On that picture she had

dressed up for a play, she actually a brunette. She looks something like 16-18 years old. As i mentioned there's no slutty or nude pictures, so it not anywhere close too pornography.

You could make a fake Facebook or Myspace profile with the package, but it wouldn't get as many hits, because she's not hot. Although she look's like she's under 18 years old, so it could be used to trick pedophiles, although you have nothing more that pictures were she's fully dressed to give them. That's not something I do (moral reasons), so i don't quite see what use I could get from this package except making a fake Facebook profile. A good thing is that it's 200 and something pictures of the girl. So if you would create a fake Facebook, the big amount of pictures would contribute to making the profile seem more legit.

It looks like the picture is take from her Facebook or maybe straight from her computer. I would defiantly recommend you to pick package #2. But if you could choose booth, pick this too, it's free !
