Thread: [WTFUD - Online Crypter \[Coded in Assembly | 3-10kb stub | Transformation Matrix\]](#)

f1sh - September 2, 2011, 8:11 am

- + Our service provides you with the worlds smallest FUD crypter.
- + We use an advanced technique known as transformation matrix.
- + This transformation matrix changes the order of each byte in your program to decrease the rate at which the file is detected.
- + You can think of this like scattering puzzle pieces in a random order.

WTFud uses an Enterprise Level Cryptographic authentication system similar to webmoney. In order to access your account you must generate a unique one time token. This token can only be used by you and you alone with the pc it was generated on.

Because of our challenge response system not only are we able to stop people from sharing their accounts while creating longer FUD times, but we're also able to prevent unauthorized access to your account.

Another unique feature of our crypter is the stubgen. Our stubgen generates a new unique source each crypt using our code pool.

There are several benefits of using our ASM crypter.

- + Faster Updates
- + Small Size (average 5 kb, 3-10kb)
- + Great For Exploit Packs
- + Use less bandwidth on mass download
- + Quality service from an ASM coder of 7 years.
- + Absolutely no dependencies!
- + Nearly a 100% execution rate!
- + Compatible with nearly every type of binary!
- + Unicode Support
- + Argument Support

- +\$25 (one month)
- +\$50 (three months)
- +\$80 (lifetime)

To buy, PM [?????](#)! or add the coder on MSN: wtfud@live.com

For more info (ICQ/MSN) visit <http://www.wtfud.net> !

Breakbeat Junkie - September 2, 2011, 8:13 am

Looks really good :)

Good luck on your sales!

iDeVeLoPeR - September 2, 2011, 8:14 am

Gonna check this right now. Can this crypt XR ? I also added you on msn.

Falconw0w - September 2, 2011, 8:17 am

i had tried it when you'll were giving free crypts , it was good was getting 4/35 , crypted file was just 20-23 kb more then normal !

Best of luck with sales

CRT - September 2, 2011, 8:27 am

Iv'e used the free version, really good! Can this crypt XR 4.2?

ginhev123 - September 2, 2011, 8:28 am

This says it all.

Please don't say that your crypter is FUD if it is UD and don't call it 3-10kb if it is 20-23 kb.

dude , what do expect for free ???

go spend money to get fud thing !

i am complimenting the product !

DeMoNi - September 2, 2011, 8:33 am

Paid version = FUD and 3/10 kb stub

Free version = UD and 20/30 kb stub

That's all, wonderful crypter.

Might buy it but atm the website is down :(

Donrulezz - September 2, 2011, 8:34 am

site is down how to crypt lol... pzl fix site

[H]ell - September 2, 2011, 8:44 am

Could you please, please add a start up function to the software?

So you can select a install path, like %appdata%

f1sh - September 2, 2011, 10:31 pm

Site is under DDoS, I will open the thread again when the site is back up again.
