Thread: [Downloads aren't appearing in my Downloads folder?](#)

The Milkshake Man - September 2, 2011, 2:05 pm

[IMG]http://i51.[censored].com/r1ikqs.jpg[/IMG]

Just bought Chronic Crypter, and I'm trying to run the .exe. When I download it, it doesn't appear in my Downloads folder, and I've searched my entire computer, to no avail.

I've tried re-downloading it multiple times, it's not saving anywhere :(

Any help?

-Edit-

Just tried DL'ing it on my netbook, saving it on a USB and installing it that way - After I dragged the App onto the desktop and double clicked it, it disappeared... >.>

It might because you set the downloads to appear else where.

Mine, downloads to the desktop.

It is, turned it off right before I DL'd it.

I use Norton if it matters ^_^

Bump.

Says my message is to post...
