Thread: [\[C#\(VB\)-SRC-Free\] Crypter DLL, crypt from within a DLL. Make a crypter in a minute!](#)

CaptainBri - September 2, 2011, 2:24 pm

As a 'celebration' of my 300th post on LeetCode, I'm releasing a so called 'Crypter-DLL' to crypt from within a DLL file.

[img]<http://img263.imageshack.us/img263/2540/screenshot2011090223275.png>[/img]

Options:Twelve RunPE's to choose from

RunPE as Base64 string storage

Resource storage method for files

Written in C# 2.0

Randomized variable names

Add the crypted file to startup

Unique variable naming

Over 790 lines of code!

[img]<http://img710.imageshack.us/img710/3238/screenshot2011090216112.png>[/img]

Configure Assembly:Title

Description

Copyright

Company

Product

Version

FileVersion

Install the crypted file:Application Data

Temp folder

No install

Inject into:Default Browser

VBC

CSC

Manual injection (for ex. svchost.exe)

A bunch of encryptions to choose from:DES

TripleDES

Rijndael

RC4

XOR

Symentric

RC2

PolyRev

PolyStairs

DEX

PolyBaby

AES

Cloud

Stairs

PolyCloud

Poly3DES

PolySymentric

PolyRC2

PolyDEX

PolyAES

PolyRijndael

To use it, simply add the DLL as a reference and make a new CrypterClass. Set the options, then use the function "Encrypt" from the CrypterClass.

```
Code CrypterClass Class = new CrypterClass();
```

```
Class.Encrypt("C:\\File1.exe", "C:\\File2.exe");
```

Note: You can also use the DLL in VB.NET!

Have a nice day,
CaptainBri

Local Celeb - September 2, 2011, 2:27 pm

Time to see a load of new crypters coming up.

Nonetheless, nice work.

dwarf2000 - September 2, 2011, 2:32 pm

Nah this ain't nice, not at all.

This is fucking orgasmic.

DeMoNi - September 2, 2011, 2:33 pm

Lol yeah you make me laugh XD, btw nice share =)

Eternal Five - September 2, 2011, 2:38 pm

Hey, once again an epic share from Mr Bri. ?

SequenceInitiated - September 2, 2011, 11:37 pm

Injection into default browser? Since when is Mozilla, IE, Opera, or any major browser coded in .net? Unless you've made your own RunPE that's able to inject a native into a non-native, there's no use or it.

hacphongthan - September 3, 2011, 6:22 am

very nice

i'm trying to learn C#

good example

Imaginary - September 3, 2011, 6:23 am

Very nice release, thank you for this.

MoonWalker - September 3, 2011, 9:03 am

Awesome share, as always. Thanks a lot CaptainBri. :)

Malitastic - September 3, 2011, 9:33 am

What an insane release, thanks for this :D

Banks? - September 3, 2011, 9:53 am

Figures that one of the only things that gets noticed anymore is something that has to do with crypters.

Silicon - September 3, 2011, 10:44 am

Who tipped a load of jizz in my pants?

Oh no nevermind. I just came when I saw this. <3

Xori - September 3, 2011, 12:47 pm

I highly suggest removing PolyCloud; it throws random input-length related bitchfits... Nice job though, maybe also put injection methods into a separate DLL because people will most likely need to encrypt it to keep FUD...

???G? - September 3, 2011, 5:08 pm

Lol, I just went to see that Leetforums of yours and went to the c sharp section... Your tutorials are pretty freaking good :)

Xori - September 3, 2011, 10:04 pm

Are you an idiot, do you realize that the most popular RATs are coded in VB6 or Delphi? (BS = VB6, CG/SpyNet/DC = Delphi)

(Sep 4, 2011 03:39 AM)CaptainBri Wrote: [\[CITE\]](#) Thanks ^^, it's not my forum, but I highly enjoy being there ?

True, it gives random errors some times. Up to the people who are going to build a crypter with it, to use it or not. Oh, if you like to modify it, be my guest ;)

I keep trying signing up but I always get the error : "Please correct the following errors before continuing:

Wrong answer, Your answer to the Extra Security Question is incorrect, try again !!"

I checked at least 5 times, there is no extra security question and I left nothing blank, even the referring box

I don't know much about the internals of encryption algorithms, I guess to use it you could always

chop the input to multiple parts, crypt them separately and put them together with some sort of a split byte inbetween...

AA:PG - September 11, 2011, 9:50 am

Thanks a lot for the source.

How can i have access to the code of the dll if i want to change it ?

versx - September 17, 2011, 8:15 pm

This is pretty awesome, thanks for sharing CaptainBri.

madcsharp - December 12, 2011, 10:16 pm

I try to use dll to crypt DC Server but after crypting the File will Not run. Can anybody tell me why? I Use Win7 64 C#
Thanks

Invicta - December 13, 2011, 9:28 am

This is probably the best .dll ever created..

QQ N00b - May 2, 2015, 5:52 pm

Link down. Can somebody reupload in the thread or send me a PM?

This thread is from 2011. If you want to make your own crypter, look at this.
