27 Shells i found on pastebin.com

that look private becuase it someone told me on HF ,if not prove it :)

? sorry for trolling u??????????????

I'm pretty sure I have over 1000 working shit public shells that people give out all over HF to get rep etc. If op would like proof I have private dedi's I would be more than happy to send him a test shell or to and prove they all hit over 75,000 packets per second.

im upgrading to l33t well i submitted lastnight idk if that makes me trusted.either way i have about 170 dedi shells,very hard hitting,all private and exploited by me,i dont really sell shells so i guess prices are negotiable in the matter you tell me what you wanna pay and i will either accept or deny,for more info pm me.

3 freshly exploited shells, one of them hits 10k

pm me
