Thread: [ShadowTech Rat 1.0 Release!](#)

KingCobraXD - September 4, 2011, 6:03 pm

Alright, guys. As promised, here's ShadowTech Rat!

Screenshot:

[img]<http://i.min.us/ibwwhq.png>[/img]

Features:

- Updates server
- Change ID
- Restart Server
- Uninstall Server
- Close Server
- Logoff Computer
- Restart Computer
- Shutdown Computer
- Get Clipboard
- Set Clipboard
- Clear Clipboard
- Remote Desktop
- Remote Webcam
- Remote File Manager
- Remote Process Manager
- Remote Chat
- Visit URL
- Download + Execute
- Send Message
- Batch Scripting
- Html Scripting
- Vbs Scripting
- Open CD Drive
- Close CD Drive
- Disable Keyboard + Mouse
- Enable Keyboard + Mouse
- Turn Off Monitor
- Turn On Monitor
- Swap Mouse Buttons
- Show Taskbar
- Hide Taskbar
- Disable Command Prompt
- Enable Command Prompt
- Disable Registry
- Enable Registry
- Disable System Restore
- Enable System Restore
- Disable Task Manager
- Enable Task Manager

- Text To Speech
- Add To Startup via Registry
- Melt Server On Execution
- Registry Persistence
- Show MessageBox On Start
- Custom Assembly Information

Notes:

As of this version, the remote webcam is a little slow. Hopefully, this would be fixed next version.

Download Link:

EDIT #4:

[Video: <http://www.youtube.com/watch?v=A0cbuxn8ggE>]

SIM-297877 - September 4, 2011, 6:14 pm

I like it, What did you use for the Remote Desktop? TCP or UDP?

KingCobraXD - September 4, 2011, 6:20 pm

(Sep 4, 2011 06:14 PM)SaturnsVoid Wrote: [\[CITE\]](#) I like it, What did you use for the Remote Desktop? TCP or UDP?

I'm using TCP for everything. Lol. Maybe I'll change it to UDP in the next version.

Breakbeat Junkie - September 4, 2011, 6:22 pm

Is this using UPnP? :)

I'll try this tomorrow, thanks!

Edit: Nevermind the question..Lol :D

Rvaveo - September 4, 2011, 6:27 pm

Great job on using upnp there are only few who use upnp

gotoel - September 4, 2011, 6:30 pm

Very good work!

I'm actually making my own as well.

Did you use any guides to make the server start on startup and the builder? Or is everything made from scratch by you?

spikebites - September 4, 2011, 6:31 pm

awesome, I am excited to test this and try it out.. I will leave some feedback if I find any bugs.

KingCobraXD - September 4, 2011, 6:33 pm

(Sep 4, 2011 06:30 PM)gotoel Wrote: [\[CITE\]](#) Very good work!

I'm actually making my own as well.

Did you use any guides to make the server start on startup and the builder? Or is everything made from scratch by you?

I did start off with xSilent's tutorial. Then I'd figure I'd do this my own way.

@ Others

THanks for the positive feedback. =)

SIM-297877 - September 4, 2011, 6:43 pm

(Sep 4, 2011 06:33 PM)KingCobraXD Wrote: [\[CITE\]](#) I did start off with xSilent's tutorial. Then I'd figure I'd do this my own way.

@ Others

THanks for the positive feedback. =)

I am currently building a DDoS Program, Is there a tutorial for UPnP? Never used it before.

KingCobraXD - September 5, 2011, 5:08 am

(Sep 4, 2011 06:43 PM)SaturnsVoid Wrote: [\[CITE\]](#) I am currently building a DDoS Program, Is there a tutorial for UPnP? Never used it before.

Well, there are some on google. Lol.

Slayer - September 5, 2011, 5:13 am

This is sick! Keep it up :D About crypting it... Have you tried it?

KingCobraXD - September 5, 2011, 5:14 am

(Sep 5, 2011 05:13 AM)Slayer Wrote: [\[CITE\]](#) This is sick! Keep it up :D About crypting it... Have you tried it?

Nope. I haven't tried crypting it cuz I don't have any crypters on me. Lol.

Slayer - September 5, 2011, 5:27 am

[IMG]<http://i.min.us/jbuYRsB58ub5dS.jpg>[/IMG]

I clicked "Quit" and my server died o.o

KingCobraXD - September 5, 2011, 5:30 am

(Sep 5, 2011 05:27 AM)Slayer Wrote: [\[CITE\]](#) [IMG]<http://i.min.us/jbuYRsB58ub5dS.jpg>[/IMG]

I clicked "Quit" and my server died o.o

Hmmm....When does that error show up?

Slayer - September 5, 2011, 5:33 am

(Sep 5, 2011 05:30 AM)KingCobraXD Wrote: [\[CITE\]](#) Hmmmm....When does that error show up? You can see chat in behind, I sent "a" and closed it (the chat that oppened when I sent, the "victim's chat") and that showed up. I'm not pretty sure if I've done anything more but that.

KingCobraXD - September 5, 2011, 5:35 am

(Sep 5, 2011 05:33 AM)Slayer Wrote: [\[CITE\]](#) You can see chat in behind, I sent "a" and closed it (the chat that oppened when I sent, the "slave's chat") and that showed up. I'm not pretty sure if I've done anything more but that.

K. Thanks. I will look into it. Lol.

Breakbeat Junkie - September 5, 2011, 5:46 am

[img]<http://k.min.us/jdsRSwrBkfWS.png>[/img]

When I clicked "Build Server"

KingCobraXD - September 5, 2011, 5:47 am

(Sep 5, 2011 05:46 AM)?eborn Wrote: [\[CITE\]](#) [img]<http://k.min.us/jdsRSwrBkfWS.png>[/img]

When I clicked "Build Server"

You need .Net Framework 2.0 installed. =)

Breakbeat Junkie - September 5, 2011, 5:49 am

(Sep 5, 2011 05:47 AM)KingCobraXD Wrote: [\[CITE\]](#) You need .Net Framework 2.0 installed. =)
I got 4.0 installed.

And I tried to infect myself via sandboxie. I get the popup message and such, but I can't see the connection. My router is fucked up tho, might be because of that. :)

Anyway, good work on this, I like it :)

KingCobraXD - September 5, 2011, 7:13 am

Alrite, people. Here's a picture of the next update:

[img]<http://i.min.us/ilubKJmcGXpXj.png>[/img]

Yes, I plan on renaming it to StormRat. =)

bobolobo - September 5, 2011, 7:21 am

Looks pretty good, thats zerowierdletters theme right?

KingCobraXD - September 5, 2011, 7:56 am

(Sep 5, 2011 07:21 AM)bobolobo Wrote: [\[CITE\]](#) And thats why your webcam is slow :b..
Actually, my webcam is slow because I'm constantly turning it on and off, grabbing a screenshot each time. I do plan on fixing it. =)

(Sep 5, 2011 07:56 AM)uitklapbare eekhoorn Wrote: [\[CITE\]](#) Looks pretty good, thats zerowierdletters theme right?

Actually, that's Aeonhack's Storm Theme. That why it's gonna be renamed to StormRat. Lol.

50GTB - September 5, 2011, 8:05 am

Other RAT from peoples source codes i bet.

KingCobraXD - September 5, 2011, 8:06 am

(Sep 5, 2011 08:05 AM)YTubeBooster Wrote: [\[CITE\]](#) Other RAT from peoples source codes i bet.
Nope. It's just partially based on xSilent's tut. That's about it.

Modestep - September 5, 2011, 8:07 am

I think the hardest part for this was creating the connections and handling them?

KingCobraXD - September 5, 2011, 8:09 am

(Sep 5, 2011 08:07 AM)Modestep Wrote: [\[CITE\]](#) I think the hardest part for this was creating the connections and handling them?

Not really. Since xSilent's tutorial already handles most of that part. It's the file transfer that took me the longest to create.

Modestep - September 5, 2011, 8:26 am

(Sep 5, 2011 08:09 AM)KingCobraXD Wrote: [\[CITE\]](#) Not really. Since xSilent's tutorial already handles most of that part. It's the file transfer that took me the longest to create. I need to make a chat project for my school, its like my grand project, is xsilents connection code good? Or do you recommend to code my own?

KingCobraXD - September 5, 2011, 8:32 am

(Sep 5, 2011 08:26 AM)Modestep Wrote: [\[CITE\]](#) I need to make a chat project for my school, its like my grand project, is xsilents connection code good? Or do you recommend to code my own?

I actually find his connection code pretty stable with no/little loss of data between the connections.

AlienBytes - September 5, 2011, 8:54 am

It sound nice , gonna try it thanks:D

SIM-701256 - September 5, 2011, 9:21 am

Very nice. but it got a bug with keystroke manager, when i type ":)" it says server stopped working.

Teletubbies - September 5, 2011, 9:24 am

Suggestions:

You should make the remote desktop screen bigger its a bit to small

You should make it like dark comet when you double click their comp it opens up a control window

And the DI and execute isn't working for me

KingCobraXD - September 6, 2011, 5:13 am

(Sep 5, 2011 09:21 AM)?gcm?rtin Wrote: [\[CITE\]](#) Very nice. but it got a bug with keystroke manager, when i type ":" it says server stopped working.

Thanks. I will take a look into it. =)

EDIT:

Wow. That is one horrible bug. I gotta fix that soon.

(Sep 5, 2011 09:24 AM)Teletubbies Wrote: [\[CITE\]](#) Suggestions:

You should make the remote desktop screen bigger its a bit to small

You should make it like dark comet when you double click their comp it opens up a control window

And the DI and execute isn't working for me

1. You can resize the remote desktop window.
2. If you double-click the listviewitem, it will show the computer's info.
3. You need a direct download link (includes the "http://").

djmayur - September 6, 2011, 5:24 am

nice share...well does it needs portforwrding thing ???

(Sep 6, 2011 05:24 AM)djmayur Wrote: [\[CITE\]](#) nice share...well does it needs portforwrding thing ???

Unfortunately, it requires port-forwarding. =(

hazeleekaizera - September 6, 2011, 6:21 am

iam download it

i will test it bradaaa

KingCobraXD - September 6, 2011, 3:11 pm

(Sep 6, 2011 06:21 AM)hazeleekaizera Wrote: [\[CITE\]](#) iam download it

i will test it bradaaa

Great! Please let me know how it goes. =)

versx - September 6, 2011, 7:02 pm

This is what happens when I open the file without doing anything.

[img]http://versx.net/i/images/sweet.png[/img]

It also crashes on me once I click the Start button from the menu. I have all the config/settings setup etc and I'm running Windows 7 Ultimate 32bit with all the .NET Frameworks.

KingCobraXD - September 7, 2011, 4:19 am

(Sep 6, 2011 07:02 PM)versx Wrote: [\[CITE\]](#) This is what happens when I open the file without doing anything.

It also crashes on me once I click the Start button from the menu. I have all the config/settings setup etc and I'm running Windows 7 Ultimate 32bit with all the .NET Frameworks.

O.o I think I figured out what happened. I used the wrong listview for UPnP. ???

versx, if it crashes, it usually means some other program is using that specific port. Maybe you should try another port first? BTW, I updated the download link. =)

versx - September 7, 2011, 11:14 am

(Sep 7, 2011 04:19 AM)KingCobraXD Wrote: [\[CITE\]](#) O.o I think I figured out what happened. I used the wrong listview for UPnP. ???

versx, if it crashes, it usually means some other program is using that specific port. Maybe you should try another port first? BTW, I updated the download link. =)New link fixed everything. ?

I'd like to make a few suggestions though. In the process manager you could make it so when you click the Process Name column it would sort the processes ascending and descending. Another would be in the file manager if you double click on a picture it would be nice to have a little preview of some sort.

None the less a great release and I'll definitely be testing it. I'll see if it can run on Windows 8 right now.

EDIT The flags for the victims aren't showing up for me for some reason. They're just blank with two dashes in it (- -)

EDIT I can confirm that the client and server both work perfectly with Windows 8 64bit Build 7989 although it displays it as Windows Vista.

Anonymous-Hacker - September 7, 2011, 12:51 pm

Very nice Post !

R.A.T is pretty good could need some improvement and a tutorial on how to use it

I was also thinking you should add a Chat Tab so you can chat with your victims cause i love chattin with my victims

ident - September 7, 2011, 1:02 pm

(Sep 5, 2011 05:30 AM)KingCobraXD Wrote: [\[CITE\]](#) Hmmm....When does that error show up?

ThreadAbortException is thrown when you abort a thread, which is not the way to end threads either way but thats not the subject right now. If you abort a thread you should handle this with a Try, Catch and catch ThreadAbortException.

When a call is made to the Abort method to destroy a thread, the common language runtime throws a ThreadAbortException.

KingCobraXD - September 7, 2011, 2:38 pm

(Sep 7, 2011 11:14 AM)versx Wrote: [\[CITE\]](#) New link fixed everything. ?

Thanks for the information! I will make sure this doesn't happen again. =)

Deceptive - September 7, 2011, 4:49 pm

When releasing use the "try" function so the application doesn't crash when a simple error occurs. Also, use the try function around when you start listening on the entered port so the application won't crash if they try to listen on the a port that is already in use.

KingCobraXD - September 7, 2011, 5:00 pm

(Sep 7, 2011 04:49 PM)Deceptive Wrote: [\[CITE\]](#) When releasing use the "try" function so the application doesn't crash when a simple error occurs. The funny thing is that I did do that. I actually use the try function for most of all my coding. Even with the try function, the app still crashes when it is trying to use a port that is already used. ?

Dally180 - September 7, 2011, 8:57 pm

You could sell this and make some \$\$ because this is one of the best rats I have seen.

KingCobraXD - September 8, 2011, 5:28 pm

(Sep 7, 2011 08:57 PM)Dally180 Wrote: [\[CITE\]](#) You could sell this and make some \$\$ because this is one of the best rats I have seen.

Lol. Yes I can. But I chose not to because doing port-forwarding support can be a pain. ?

Actually, my app won't start without .net framework 3.5. The minimum requirement for the client is 3.5. The minimum for the server is 2.0. You have 3.5 installed since you can run the client.

RudeHack3r - September 10, 2011, 6:30 am

(Sep 10, 2011 06:13 AM)KingCobraXD Wrote: [\[CITE\]](#) Actually, my app won't start without .net framework 3.5. The minimum requirement for the client is 3.5. The minimum for the server is 2.0. You have 3.5 installed since you can run the client.

okay okay it's my fault if you have errors in your code okay okay OKAY :)

i have no 3.5 on my VM

KingCobraXD - September 10, 2011, 6:33 am

If you ask me, there are no errors when building. You just need to have .net framework 2.0 since it uses that compiler to change assembly. I've tried it on all machines and it works smoothly. If you don't have 3.5, then you can't run the client itself since that requires 3.5.

RudeHack3r - September 10, 2011, 6:34 am

(Sep 10, 2011 06:33 AM)KingCobraXD Wrote: [\[CITE\]](#) If you ask me, there are no errors when building. You just need to have .net framework 2.0 since it uses that compiler to change assembly. i try with 3.5 now, perhaps the problem come from this :p

KingCobraXD - September 10, 2011, 6:45 am

(Sep 10, 2011 06:34 AM)RudeHack3r Wrote: [\[CITE\]](#) i try with 3.5 now, perhaps the problem come from this :p

One more thing. If you have an AV, turn it off so it won't interfere with the compiling.

RudeHack3r - September 10, 2011, 6:47 am

(Sep 10, 2011 06:45 AM)KingCobraXD Wrote: [\[CITE\]](#) One more thing. If you have an AV, turn it off so it won't interfere with the compiling.

yes man it work nice with 3.5 :D (sorry for the inconvenience)

2.0 + 3.5

[img]<http://img571.imageshack.us/img571/1016/sansreca.png>[img]

KingCobraXD - September 10, 2011, 2:18 pm

(Sep 10, 2011 06:47 AM)RudeHack3r Wrote: [\[CITE\]](#) yes man it work nice with 3.5 :D (sorry for the inconvenience)

2.0 + 3.5

[img]<http://img571.imageshack.us/img571/1016/sansreca.png>[img]

Lol. All this is confusing. I can promise you that it requires 3.5 to run yet, you can run it with 2.0. Then I say you need 2.0 to compile yet, you have 2.0 and you can't build it until you have 3.5. Must be a weird day today. O.o

bxak1116 - September 10, 2011, 5:56 pm

very nice release, great work, appreciate it

abc2101 - September 10, 2011, 8:31 pm

what can i do with this program can i hack into a cp and steal files

Sho?kwave - September 10, 2011, 9:47 pm

Man this looks so nice, i'm working on a rat atm to :P, gonna take ages though -_-

KingCobraXD - September 11, 2011, 3:47 am

Thanks for the positive feedback, guys. Much appreciated. =)

Zincco - September 11, 2011, 3:50 am

(Sep 10, 2011 08:31 PM)abc2101 Wrote: [\[CITE\]](#) what can i do with this program can i hack into a cp and steal files

You're gonna hack into what and do what?

This is a RAT.

KingCobraXD - September 11, 2011, 2:43 pm

(Sep 11, 2011 03:50 AM)Zincco Wrote: [\[CITE\]](#) You're gonna hack into what and do what?

This is a RAT.

Lol. Looks like someone needs to understand how a rat works. O.o

badlyfar - September 11, 2011, 3:23 pm

Nice first release, has potential. Just a few bugs to be worked out!

Darktheif - September 11, 2011, 3:24 pm

Ill try it...

Usb, lan spread would be nice (<- suggestion)

AntiSec - September 11, 2011, 4:07 pm

King PM me your MSN again!! I gotta talk to you again(:

Menalix - September 11, 2011, 4:38 pm

(Sep 4, 2011 06:43 PM)SaturnsVoid Wrote: [\[CITE\]](#) I am currently building a DDoS Program, Is there a tutorial for UPnP? Never used it before.

UPnP is the architectur in TCP it's very easy so translate a UDP flooder to a TCP flooder. For ddos UDP is better then TCP.

TCP allows you to send larger packets.

UDP packets is smaller packets.

Even how fast the internet where the packets is send from the internet will always have the same speed even you use TCP or UDP ofcourse.

Example:

We say that we're now attacking a server in 10 seconds.

UDP is getting send 20 packets each contains 60kb = 1,2mb

TCP is getting send 1 packet containing 1,2mb

They will send the same size of data at the same amount of time.

The diffrence is just UDP will split it up in more packets which is better to make a server go crazy, cause it needs to handle more requests.

hopes you get it. :)

Just wrote a thread about this

KingCobraXD - September 13, 2011, 3:24 am

AntiSec - September 13, 2011, 4:41 am

Kingggg you should sell ShadowTech RAT on like your future version of the rat, and a different free public version so it helps with sales, like the paid version with more features and public with the current+less features lol

KingCobraXD - September 13, 2011, 1:29 pm

(Sep 13, 2011 04:41 AM)AntiSec Wrote: [\[CITE\]](#) Kingggg you should sell ShadowTech RAT on like your future version of the rat, and a different free public version so it helps with sales, like the paid version with more features and public with the current+less features lol

Lol. I have thought about that but I feel like having support for my customers might be beyond my capabilities.

AntiSec - September 13, 2011, 8:01 pm

You know I'm here for you man, don't worry!

KingCobraXD - September 14, 2011, 3:53 am

(Sep 13, 2011 08:01 PM)AntiSec Wrote: [\[CITE\]](#) You know I'm here for you man, don't worry!

Lol. But imagine a ton of people coming up to you asking for support on port forwarding. O.o

Then you would need to tv all of them. Lol.

Kiyongo - September 14, 2011, 10:07 am

This is awesome mate

Nice one

In next version you can add auto spread like USB, LAN, RAR and act.

Thanks for this RAT.

KingCobraXD - September 14, 2011, 1:55 pm

JIT Debugging

To enable just-in-time (JIT) debugging, the .config file for this application or computer (machine.config) must have the jitDebugging value set in the system.windows.forms section. The application must also be compiled with debugging enabled.

For example:

```
<configuration>
  <system.windows.forms jitDebugging="true" />
</configuration>
```

When JIT debugging is enabled, any unhandled exception will be sent to the JIT debugger registered on the computer rather than be handled by this dialog box.

(Oct 8, 2011 07:41 AM)abc2101 Wrote: [CITE](#) what is a rat and wat can i do with a rat
A Rat can be used to control another person's computer from your computer.

inushakolla - October 9, 2011, 3:22 am

I am really waiting for a release above 1.0 :L when you do release it please pm me and notify.
OP : after executing server you cannot delete it due to a running process ?

Zeromusx - October 9, 2011, 4:15 am

I waited for this a long time. Had the previous thread sub'd. Thanks for releasing it!

KingCobraXD - October 9, 2011, 7:59 am

@inushakolla

Lol. If a process is running, you can't delete the file unless you kill the process from task manager. This is true for all processes, not just the server of my rat.

@Zeromusx

Thanks for the positive feedback! =)

New video uploaded! The video could have been better but I needed to do something else so it isn't as great as it should be.

chester1997 - October 9, 2011, 9:50 am

WOW really nice man , can you possible release source or snippets of it :P

IDontNeedAUsername - October 9, 2011, 10:20 am

Could you maybe tell me/PM me how you would make a remote desktop/desktop viewer. I followed xSilent's connection tutorial and succeeded in making a rat with features like visit an url, downloader and messagebox. But I can't seem to figure out how to make a remote desktop.

Azotik - October 9, 2011, 10:27 am

Really Nice RAT, thanks for the release :)

KingCobraXD - October 9, 2011, 2:21 pm

Well, there was this method of converting the screenshot to base64 string and sending it over. But, I did mine another way in which I want to keep private.

Yeah, I know the method of converting it to base64 but that laggs and it takes ages for the program to send the string. Too bad you won't share your method:(

KingCobraXD - October 10, 2011, 10:27 am

(Oct 10, 2011 09:57 AM)?Ju1?y? Wrote: [\[CITE\]](#) Yeah, I know the method of converting it to base64 but that laggs and it takes ages for the program to send the string. Too bad you won't share your method:(

Lol. My method requires a change in the way it sends data in the connection class. =)

Deflux - October 10, 2011, 10:29 am

Very Nice! Love it, but the GUI kinda lackin'. Gui doesnt really matter though. Thanks for the rat.

joey213 - October 10, 2011, 10:30 am

Hello youre rat looks very good. Does it got a keylogger build in?

KingCobraXD - October 10, 2011, 10:31 am

(Oct 10, 2011 09:52 AM)inushakolla Wrote: [\[CITE\]](#) Not really, one i run cybergate server I am able to delete the server without killing the process and I'm still infected. With this RAT I can't delete the server without killing the process and its hard to find the process.

Lol. Is that a good thing (hard for victims to remove)?

Well, that's cuz cybergate installs itself into the victim's computer so you could delete the original exe. But like you said, the computer is still infected. If I remember correctly, if you check the installation checkbox, you can delete the original file just like you did with cybergates. As for the process, I BELIEVE it's either called the name of its file or "Windows Update". =)

(Oct 10, 2011 10:30 AM)joey213 Wrote: [\[CITE\]](#) Hello youre rat looks very good. Does it got a keylogger build in?

Yes it does. But currently, it has some small bug with the keylogger....

Momz - October 10, 2011, 11:28 am

Dude, this is such a sexy release. Thanks for it, and keep up the good work!

inushakolla - October 10, 2011, 11:39 am

cooleo,... put a cool darky theme and it will rock.

KingCobraXD - October 10, 2011, 11:39 am

(Oct 10, 2011 11:28 AM)Momz Wrote: [\[CITE\]](#) Dude, this is such a sexy release. Thanks for it, and keep up the good work!

Lol. Thanks for the positive feedback. Version 2 is gonna come out pretty late since I'm gonna be busy for a few months. -.-"

(Oct 10, 2011 11:39 AM)inushakolla Wrote: [\[CITE\]](#) cooleo,... put a cool darky theme and it will rock. Lol. Let's see how it all turns out first. =)

WicKd - October 10, 2011, 4:06 pm

Looks GREAT! I LOVE how you kept the GUI nice and simple, but with many features :) Keep up the good work!

KingCobraXD - October 10, 2011, 4:07 pm

Thanks for the positive feedback. Much appreciated. =)

????? - October 10, 2011, 5:03 pm

Looks more like a ddoser then a rat but very nice job.

I like the interface.

inushakolla - October 11, 2011, 7:52 am

(Oct 10, 2011 05:03 PM)Bytes Wrote: [\[CITE\]](#) Looks more like a ddoser then a rat but very nice job.

I like the interface.

How does this look like a ddoser? ddoser's never have so many functions -.-

Zeromusx - October 12, 2011, 8:26 am

I'm having some issues. When I enter TCP, a port (let's say 1604) and a description in uPnP I can't click the add button. So I started DarkComet and opened port 1604 and then tried the config screen and filled in everything correctly, when I hit start the whole application just quits.

inushakolla - October 12, 2011, 11:19 am

You started dark comet and opened port 1604 ? what do you mean, I really don't get you.

* you cant forward ports by simply running dark comet.

*you cant use more than one application on one port at a time (For RATs)

Try forwarding the port by portforward.com and then try.

KingCobraXD - October 12, 2011, 2:45 pm

(Oct 12, 2011 08:26 AM)Zeromusx Wrote: [\[CITE\]](#) I'm having some issues. When I enter TCP, a port (let's say 1604) and a description in uPnP I can't click the add button. The reason why you can't click the "Add" button is because UPnP don't work with ur router. At least not the one that is implemented. And since DarkComet is connected to that port, you cannot use that same port since it's already been used by DarkComet. The applicatio crashes since the port is already in use.

Fredo In The Cut - October 12, 2011, 3:27 pm

Do you need to portforward this? :)

KingCobraXD - October 12, 2011, 4:09 pm

(Oct 12, 2011 03:27 PM)GoldTrader Wrote: [\[CITE\]](#) Do you need to portforward this? :)

Yes you do. This is a portforwarding Rat. =)

Zeromusx - October 12, 2011, 11:17 pm

Oh I thought it ws a non portforwarding RAT, and my router does support uPnP I am already using it for Souleseek, DC and miniuPnP. Well if it's a PF'ing RAT then I can't use it but anyway nice simple, lightweight RAT

MistaCode - October 13, 2011, 3:24 am

wow nice one +reps for you bro keep it up

SoulZeh - October 13, 2011, 4:15 am

(Oct 13, 2011 03:24 AM)GetTheCode Wrote: [\[CITE\]](#) wow nice one +reps for you bro keep it up

You know the sad thing about your post bet you don't realise you can't +rep him, but I'm sure I posted on this before it a nice Release.

TheVBNetwork - October 24, 2011, 10:14 am

Can I Buy the Source Off You, Or Can I Pay You To Teach Me How To Make A R.A.T (Just The basics)

KingCobraXD - October 25, 2011, 5:40 pm

@SoulZeh

Thanks for the positive feedback. ^.^

@ExotiicDeath

I would actually prefer selling the source over teaching someone how to code one. Lol. However, I am still thinking about selling the source as it may not be available.

Aghhhh I think this would be a great starting point for people if they could use it... because it's very simple but very effective

I've been thinking for a few days now and I sort of plan to sell the source sometime.

Deceptive - October 26, 2011, 7:41 pm

How many bug fixes do you think you've had to do on this?

KingCobraXD - October 27, 2011, 3:41 am

(Oct 26, 2011 07:41 PM)Deceptive Wrote: [\[CITE\]](#) How many bug fixes do you think you've had to do on this?

I've fixed many of the few bugs already. In fact, I'm almost done with the next version.

yayolover - December 6, 2011, 7:17 am

This is a great RAT, I am enjoying using it. I have a question though. When a victim sees it running in their Task Manager and kills the process, will the RAT reload at all? I had a victim online that I was watching live, and now I can't connect to them at all.

What does MELT and PERSISTENCE mean in the create server dialogue box?

timmetje21 - December 6, 2011, 7:18 am

nice1 mate to short this message, how long did it take u to build it? looks sick as hell

yayolover - December 6, 2011, 1:26 pm

For some reason this doesn't install itself?

KingCobraXD - December 6, 2011, 4:52 pm

(Dec 6, 2011 08:17 AM)yayolover Wrote: [\[CITE\]](#) This is a great RAT, I am enjoying using it. I have a question though. What does MELT and PERSISTENCE mean in the create server dialogue box?

If they kill the process, it will no longer run. If you select melt, it will "delete" itself from the user and it'll still be running. Persistence is just so that if they remove the startup registry key, it will keep adding it back.

(Dec 6, 2011 08:18 AM)timmetje21 Wrote: [\[CITE\]](#) nice1 mate to short this message, how long did it take u to build it? looks sick as hell

This actually took me a few months due to all those errors I get in the process of making it.

(Dec 6, 2011 02:26 PM)yayolover Wrote: [\[CITE\]](#) For some reason this doesn't install itself?

Mind elaborating a bit? ???

yayolover - December 6, 2011, 5:44 pm

What I meant was, once they click the .exe file and it starts working, once they restart their computer it isn't loading again.

KingCobraXD - December 6, 2011, 5:56 pm

(Dec 6, 2011 06:44 PM)yayolover Wrote: [\[CITE\]](#) What I meant was, once they click the .exe file and it

Hmmm...Are you sure you check the install checkbox?

H???? - December 6, 2011, 6:13 pm

very nice man! great work!
Thanks for the amazing share.

N4xus - December 10, 2011, 6:09 am

waiting for new version :) i liked it

KingCobraXD - December 10, 2011, 6:27 am

I'm almost complete with it. It should be coming out this month. =)

Golliath808 - December 10, 2011, 8:37 am

It looks nice
lol and coded in...??

KingCobraXD - December 10, 2011, 9:27 am

(Dec 10, 2011 09:37 AM)Golliath808 Wrote: [\[CITE\]](#) It looks nice

09-04-2011, 09:33 PM

Nice Buump dipshit.

Percocet - December 12, 2011, 2:00 am

Is there any chance you'll release the source for free at some point? Just asking.

KingCobraXD - December 12, 2011, 3:10 pm

(Dec 12, 2011 03:00 AM)killermanjaro65 Wrote: [\[CITE\]](#) Is there any chance you'll release the source
for free at some point? Just asking.

The source is on sale right now..until I change my mind, it won't be for free. At the very least, you'll
need to download from fil3ice or shitcash.

HybridStigmata - December 12, 2011, 3:19 pm

can i hack and email with this, you will give me tutorails? also plese

KingCobraXD - December 12, 2011, 3:22 pm

There are a few tutorials that other people created on youtube.

Percocet - December 12, 2011, 3:50 pm

What program are you using in the video? I'd like to have something like that.

KingCobraXD - December 12, 2011, 3:53 pm

(Dec 12, 2011 04:50 PM)killermanjaro65 Wrote: [\[CITE\]](#) What program are you using in the video? I'd like to have something like that.

I am using Camtasia to record and VMWare for testing.

Percocet - December 12, 2011, 4:00 pm

(Dec 12, 2011 04:53 PM)KingCobraXD Wrote: [\[CITE\]](#) I am using Camtasia to record and VMWare for testing.

Is VMWare a paid or free program? Cause I really need something like that.

Milopeach - December 12, 2011, 6:02 pm

You can get VMWare for free, although you need paid System Software to install and run on the temp OS.

Limeade - December 12, 2011, 6:40 pm

What's the deal with this RAT? Never seen it until today, is it still alive and functional? Still being updated?

Might give it a whirl.

KingCobraXD - December 12, 2011, 6:43 pm
