Thread: [Biohazard DDoS Tool \(Small, Yet Very Powerful\)](#)

Chaos13 - September 5, 2011, 2:59 pm

Biohazard is a tool I made to take Down websites/boot computers off the internet.
It is a powerful tool with a good user interface (Its n00b Friendly) :D

Like the image says, If you want to contribute to the project, Message me on YouTube.
I'm going to make a video about this later :D

VirusScan:

Just enter the IP in the black box :D

I've found this works REALLY well taking down IRC servers, just put server IP:PORT.

!! INFECTED !! INFECTED !! INFECTED !! INFECTED !! INFECTED !! INFECTED !!

Chaos13 - September 5, 2011, 3:14 pm

Not a network, Just a server. if it was a network, No, and don't be dissing my programs unless you try them. Thats pretty rude, Judge A Book By Its Cover?

and it is DDoS. Read The Bottom Left? Small But Powerful. Try it yourself.

Look, It gets the job done. It took me a while to create something that powerful with such a small and n00b friendly interface. Thanks for appreciating my work. I made this to be n00b friendly....

Okay so now you lie and say its infected? If your going to accuse it of being infected, At least post a virus scan.

ClockZ - September 5, 2011, 3:20 pm

Lols ugly & weak/simple... Idk Dos tools are a n00bs t00ls

V3xD - September 5, 2011, 3:21 pm

How the hell does a virus scan have anything to do with it being infected?

=\

I analyzed it myself buddy, make a new thread.

Chaos13 - September 5, 2011, 3:30 pm

Yea you can say you analyzed it but you ain't got the proof to prove it? Your Cool.

Shaggy Rogers - September 5, 2011, 3:35 pm

This is infected and chaos13 I hope you fucking get banned you little gay ass noob. Go fuck your mom. Im tired of fucking ass holes wasting my time and trying to infect other members. Go lick a cats ass.

GOOD DAY

File is infected. Do not download this.

Milky Gum Shot - September 5, 2011, 4:36 pm

LOL definitely infected..Don't download this....

Shlazam - September 5, 2011, 4:49 pm

Infected nice try brohan you fail. Imaoo

4Chan-/b/rother - September 5, 2011, 4:56 pm

The file is Infected and it doesn't even look legit because booters usually have a box for what port you want to boot.
